FIRST TERM: Monday, January 4, to Friday, February 26.

SECOND TERM: Monday, March 8, to Friday, April 30.

THIRD TERM: Monday, May 10, to Friday, June 25, for Elementary Schools — to July 2, for High School.

GRAMMAR SCHOOL GRADUATION: Wednesday, June 23.

HIGH SCHOOL GRADUATION: Wednesday, June 30.

FOURTH TERM: Tuesday, September 7, to Thursday, December 23.

THE NEW YEAR: Monday, January 3, 1916.

HOLIDAYS: February 22, April 2, April 19, May 30, June 17, October 12, and the remainder of the week from Wednesday noon next preceding Thanksgiving.

Attendance Officer

CHARLES H. JOHNSON

Office, 8 Washington Street. Office hours for issuing labor certificates; 8 to 9.30 A. M., and from 1.30 to 2 P. M., 4.30 to 5 P. M. Saturdays, from 8 to 12 A. M. 1.30 to 5 P. M.

Mayor's Address

QUINCY, MASS.

JANUARY 4, 1915

CHESTER I. CAMPBELL

MAYOR'S INAUGURAL ADDRESS

Gentlemen of the City Council and Citizens of Quincy:

In assuming the duties of Mayor of this historic city, I do so with a feeling that I accept at your hands a great responsibility; one that carries with it many serious problems. It is my purpose to administer the affairs of the municipality in a just, efficient, economical, business-like, constructive manner, and in this work, I trust that I will have your co-operation and that of every public spirited citizen.

Economy, efficiency and co-operation should be the key note of the administration of the affairs of our city, otherwise our efforts will be futile. We should use the same skill and care in the affairs of the municipality that we would in our own private business. If we desire to bring a greater measure of happiness and prosperity to the people of our city, we should make our government strictly non-partisan. While I was elected on a partisan ticket, yet I have made it clear that politics should have no part in the business administration of the affairs of our City Government. It is obvious to me that to conduct an efficient, economical business administration we must eliminate politics.

It will be my purpose at all times to keep in mind that it is essential to co-operate with you, gentlemen of the Council, in the adoption of bills for the benefit of the municipality or in the rejection of such bills as may be detrimental to the interests of the city at large. With this in mind, I solicit your hearty co-operation. In turn you members of the Council should remember that co-operation among the members of your own body and with the Mayor will tend towards a better understanding and good government. The members of the Council should view the affairs of our city in the same light that they would the interests of a great private corporation, in which they were financially interested and of which they were directors. The city funds are intrusted to them and they should weigh carefully every measure that calls for great expenditures. You members of the Council should not commit yourselves to any act that will not result in the greatest good to the city as a whole rather than to some particular section. The heads of departments and other employees of the city should strive to bring their particular cog in our municipal machine in perfect harmony with the policy of the administration, and should see to it that their work be carried on in a business-like manner. Once we have our forces co-operating we will reap rewards.

Our city is growing and at this time we should make plans for the future. By the wisdom of the Legislature I am vested with authority to create new Boards that will prepare us for the problems of even fifty years hence. It is my purpose to appoint to these commissions public spirited citizens who are willing to make the sacrifice, and who will plan a constructive policy anticipating our rapid growth. These commissions should be sufficiently powerful to prevent the

adoption of any legislation that would be a detriment to the beauty of our city or in any way endanger the health of generations to come.

We should be careful in assuming new burdens for the present. It would be more business like to protect our investments than to allow them to go to rack and ruin because of a lack of funds. If you members of the Council contemplate ordering additional improvements calling for the expenditure of great sums of money you should bear in mind that work already commenced should be first finished. This year above all others Economy should be your watchword. We are, for instance, confronted with a serious problem in the matter of streets and ways, as the highway mileage of our city is so out of proportion to our population and revenues. Streets where thousands of dollars have been expended have been going to ruin. Should we not, therefore, see to it that the vast amount of money already expended on our thoroughfares be protected before appropriations are made for new roads. Our main trunk roads should have constant attention and be kept in the best possible condition, and thus prevent the diverting of traffic to the minor residence streets. In any consideration of the streets of our city they should be sharply differentiated, according to their use, into main thoroughfares and minor streets, though there should, of course, be intermediate types. The principal highways should be wide and direct, in order to accommodate heavy traffic so well that it will keep away from the minor streets. These highways should be planned far in advance of building, in order to assure through connection. The result in saving in land, construction and up-keep, due to the concentration of travel will be very great, while the minor residence streets will be kept free from the noise and dust of heavy traffic.

While the deplorable condition of our streets should and will receive immediate attention, yet the future development of our highways has been wisely planned for, by an act of past legislature which authorizes the Mayor to appoint a Board of Survey, made up of three citizens. This act is aimed to prevent the unwise development of territory to the detriment of the City as a whole, and provides that if any person or corporation desires to lay out any street in the city of Quincy he shall, before beginning construction, submit to the Board of Survey plans and profiles of such streets, and shall prepare them so as to show the method of drainage of the contiguous territory. The power of accepting and laying out streets or ways is still vested with the City Council, but it can only do so with the approval of the Board of Survey first being obtained in the manner provided in the act. This act will also prevent land speculators from indiscriminate laying out of streets through undeveloped sections for the sole purpose of land sales, for if any individual or corporation lays out streets and ways without the approval of the Board of Survey the public authorities are prohibited by this act from doing any work in the same. The result will be that the individual will be forced to obtain the approval of the Board of Survey before developing his land.

In line with the task of giving proper direction to the future growth and development of Quincy the Mayor is directed by a legislative act (Chapter 494, 1913) to appoint a City Planning Board. It is a labor fraught with the gravest responsibility, and most far reaching consequences. It will be the duty of this Board to make a careful study of the resources, possibilities, and needs of the City, and to make plans for the development of the municipality with special reference

to the future. Quincy with its natural resources and its natural beauty will surely grow by leaps and bounds in the near future. Thousands of families will in the near future come to this city for an attractive place to live. Many diversified commercial institutions will be attracted here by the natural advantages that the city offers. In the next twenty years Quincy will probably show greater growth than any city adjacent to Boston. We should profit by the experience of others. In the plan of a city the underlying framework as its means of communication — by water, rail, and highway. To this end the railroads must be studied with reference to the increasing problems of transportation of passengers and freight. We should plan now for proper transportation for our great granite and other industries and also our increasing commercial activities. There is no reason why unsightly, unhealthy spots should disfigure our municipality. It costs more to keep them than to get rid of them, or to plan in advance against their presence. The specific aim of the city planning board is to promote health, safety, convenience and beauty in the city, thereby conserving human energy and life. Such planning concerns itself with all the physical aspects of the city — its streets, railroads, waterways, public services, its administrative, educational, recreative property; and the development of private property. It treats them as component parts of an organic whole, so that each may dovetail into the next. The economies resulting from such planning will repay the costs many times over in its items of immediate application. It will also take effective steps to eradicate many of the most unpleasant features of our city. A carefully devised city plan, made far in advance showing when and how improvements ought to be made, fitting them in properly with other improvements made and to be made would not only secure uniformity, but actually involve a smaller outlay. The work of the planning board will be of vital importance to our future citizens. The future like the past, will witness the expenditure of vast sums of money on both public and private improvements. Great savings can be made by pursuing a comprehensive and systematic plan.

We want and must have fair and equal valuations in the assessment of property, and in order to get it we should have experts who are qualified to fix fair market valuation on lands, buildings, machinery, etc. The selection of a competent board of Assessors is a hard one, inasmuch as men who are best qualified for the position would not be attracted because the fixed compensation is not sufficient. Personally, I believe that the members of this board are underpaid. I believe that in the end it would be a great economy if the salary of the members of the Board of Assessors was increased to such an amount as would enable the Mayor to select a Board that would devote all of its time to this work. Necessary provision should also be made for expert opinion upon values of such property as machinery, etc., of which the Board of Assessors has no technical knowledge. This would put a stop to inaccurate estimates. It would take too long to enter into the complete details as to the duties, liabilities and penalties, etc., of the Board at this time, but it is a fact that after the Board is appointed they automatically become directly responsible to the Tax Commissioner of the Commonwealth. The Board has always been a much abused one, and the criticism heaped upon it has not always been just.

No department in the city is so deficient from the standpoint of equipment as our Fire department. There is great need of modern

apparatus, and I recommend that the department be motorized as rapidly as possible. It is impossible to get any degree of efficiency from horse-drawn vehicles because of the great distances that have to be travelled. Municipal experts all agree that not only is the motor driven apparatus more efficient because of its great speed in reaching a fire zone, but also because of the economy in up-keep. The fire alarm system of our city is antiquated and practically no improvements have been made upon this system in the past 17 years. We are still using the storage battery system which was one of the first methods used for fire alarms. It has the old wooden type of board which has been condemned by the National Board of Fire Underwriters. This apparatus is installed in the Central Fire Station and is not only exposed to damage by fire from the building but from high tension currents leading to a wooden switchboard and wooden mountings of the repeater and cutout switches. It is absolutely necessary for the safety of our homes and industries that the fire alarm circuits have immediate attention, for owing to the old type of boxes and the overloading of the circuits we are in danger of inaccuracies in the alarms that might cause great loss of life and property. We should build a fireproof room adjoining the Central Fire Station and install a modern automatic repeater and charging board and other apparatus to bring the equipment to a high standard. A fire in the Central Fire Station at this time would put out of commission our entire alarm system.

The revenues of the Water department have shown considerable increase of late. This is due in a great measure to the activity of the collection department stimulated by our esteemed retiring Chief Executive. The investigations of leaks in the water supply are receiving attention and by the continuance of these activities I feel safe in stating that the water department will show a decided improvement during 1915.

The Police department has been severely criticised. While in some cases, no doubt, without foundation, yet better discipline must be maintained in this department. Courtesy must be extended and calls from citizens must have immediate attention. We must have promptness and efficiency.

I heartily approve of the action of the retiring Council in reference to uniform system of purchasing. This step is a most important one and points at once a method of economy which I feel the council will have in mind throughout the coming year. I see no reason why there cannot be a saving by this method which calls for orders passing through the hands of one person to be checked by the Auditor against the appropriation of the department for which the goods are intended. This will prevent any department head from unknowingly exceeding his appropriation. It is intended that each department will have full knowledge of their expenditures. It also gives the city a chance to buy on a business basis instead of having contracts placed "quietly and friendly."

City government experts throughout the country are fast realizing that the one year term for the office of Mayor does not give the Chief Executive sufficient time to bring to a successful issue an efficient, harmonious municipal organization working along economical business lines. This coupled with the agitation throughout the country for a more compact legislative body should have the attention of our citizens.

While the school department and its board do not come under the jurisdiction of the Chief Executive, yet he can do much to encourage these worthy gentlemen in the vital work they are carrying on. It is my purpose to co-operate with them in every manner possible, and in their behalf I solicit the co-operation of the City Council. In this respect the women of our city have taken the lead in co-operating with the School Board, as evidenced by the recent vote of the Quincy Women's Club which has donated a sum of money to establish a School Nurse in our city. This was done as a memorial in observance of its Tenth anniversary. I make note of this with a great deal of pleasure. It shows that the civic pride and public spirit of our women is awakened.

When the Declaration of Independence was signed John Adams said "This fourth day of July, 1776, will be the most memorable epoch in the history of America. I am apt to believe that it will be celebrated by succeeding generations as the great anniversary festival. It ought to be commemorated by solemn acts of devotion to God Almighty. It ought to be solemnized with pomp and parade, with shows, games, sports, guns, bells, bonfires, and illuminations, from one end of this continent to the other, from this time forward forevermore." Quincy, the home of John Adams, ought to certainly adopt the spirit, and in the main, the letter of his utterance. With a wealth of historical material in our city, it seems to me quite time we should fall in line with other cities in providing a July 4th Celebration along the line of Pageantry. The chief difficulty this year is financial. Such a celebration could receive little aid from the City, but I have been encouraged to believe that the different organizations of our city will heartily co-operate in a July 4th Pageant this year, and that private contributions would be sufficient to meet the expense.

Purposely I have refrained from presenting figures or estimates of the various departments. Official figures are always obtainable at the Auditor's office, and I feel that in attempting to place them before you at this time would only serve to duplicate the reports of the officials. The matters which I have touched upon are only too obvious to us all, and should receive more exhaustive study than I have been able to give them thus far. Each department of our city, however, will be fully and carefully considered and such remedy as seems best will be applied, in order to bring them to the highest standard of efficiency. It will be my constant effort to strive for better government, and this will mean greater prosperity and happiness to us all.

In conclusion, I would say that in assuming this office it is with the most cordial desire to unite such powers as are vested in the Executive, with those most active and influential organizations now proving of so much value in the advancement of our city. The Board of Trade; Women's Clubs; Parent Teachers Associations in various wards are all proving powerful instruments in the upbuilding of our historic city — and to them and to you — Gentlemen, I pledge my most hearty co-operation.

AUDITOR'S REPORT

Quincy, Mass., April 1, 1915.

To the City Council, Quincy, Mass.

In accordance with the City Charter, the Auditor of Accounts submits the annual report of his department, showing in detail the expenditures of each department.

Also several statements showing the financial condition of the City at the close of the Financial year, Dec. 31, 1914.

The Treasurer's and Tax Collector's books have been examined and I have found the required vouchers in their respective offices.

HENRY O. FAIRBANKS,

City Auditor.

CITY OF QUINCY

IN COUNCIL

ORDERED:

March 16, 1914.

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1914 and ending December 31, 1914, to be expended by and under the direction of the several officers or boards as herein designated, in accordance with the provisions of Chapter 719 of the Acts of 1913.

That the appropriations for Water Maintenance and Clerical be paid from Water Receipts.

That the appropriations for Sewer Maintenance and Clerical be paid from Sewer Assessment Receipts.

STATEMENT OF CITY DEBT

The city debt is created under the statutes allowing cities to borrow 2 1-2 of the average valuation for three years. The Parks debt was created under chapter 225 acts of 1893; street improvement debt created under chapter 225, acts 1899; sewer debt created under acts, 1895, 1902, 1905, 1911; water debt under acts of 1891, 1892, 1907, 1911 and the refunding debt under chapter 685, acts of 1912. The Statement:

Year	Municipal	Parks	St. Imp.	Sewer	Water	Refunding	Totals
1915	\$151,985.64	2,000	7,300	31,000	65,500	15,000	\$272,785.64
1916	114,000.00	2,000	7,300	31,000	63,500	15,000	232,800.00
1917	89,000.00	2,000	7,300	30,000	61,500	15,000	204,800.00
1918	73,750.00	2,000	7,300	30,000	60,500	15,000	188,550.00
1919	53,500.00	2,000	7,300	29,000	60,500	15,000	167,300.00

REPORT OF CAPTAIN

January 1, 1915.

Chief of Police,

I hereby submit my report for the year ending December 31, 1914.

Amount Stolen Property Recovered	\$3,410.00
Cases Investigated	165
Horses Killed	3
Dogs Killed	5
Fires Attended	9
Accidents Investigated	30

Respectfully,
DANIEL R. McKAY,
Captain.

REPORT OF INSPECTOR

January, 1915.

Daniel R. McKay,

Captain and Acting Chief of Police,

Dear Sir, — Following is my report for the year ending December 31, 1914 and showing the work done by the Inspector. It gives the number of reports received from expressmen holding permits to transport liquor into and in Quincy. These reports show the number of parcels or packages of liquor, the number of gallons of beer and ale, gallons whiskey and other hard liquor, gallons alcohol, and gallons wines.

Also showing the cases and dispositions of liquor prosecutions as well as other criminal work done.

The estimated cost to consumer was made conservatively after looking up the average cost of each kind and the express rates charged. This report does not include the heavy shipments of wine which are received monthly by freight from other states and which amount to many thousands of gallons, but over which the police have not the same methods to obtain actual figures.

Number of liquor law violators brought before the court ...	44
Keeping and exposing liquor for sale	27
Liquor nuisance	1
Sale of liquor	3
Club nuisance	1
Common gaming house	2
Knowingly letting building for illegal sale of liquor	1
No complaint made after raid	3
Number of raids made	40
Liquor found at raids	39
Dismissed for want prosecution	3
Discharged	1
Defaulted	3
Arrested on default	2
Arrested at raids besides party raided	35
Amount of fines imposed	\$2069.00

OTHER CRIMINAL WORK DONE

Complaints investigated	300
Criminal cases brought before the court	93
Fugitive from Justice arrested	3
For out of town Officers	4
Amount of fines imposed	\$428
Imprisonment imposed, number of years.....	13
Cases pending	6
Stolen property recovered	\$980
Fires attended	17

		\$14,794.50

CONCLUSION AND RECOMMENDATIONS

The addition of an automobile for the use of this department would be a much needed improvement, particularly on hurried calls, which are many.

Hundreds of investigations have to be made by the Captain and Inspector which could be done in much less time and more satisfactorily.

At least four more patrolmen are needed to cover sections where the residents have long been asking a more frequent patrol.

The sale of intoxicating liquors and the suppression of unlicensed places has never been relaxed and the standing of this city regarding the enforcement of liquor laws, compares second to none. I invite careful examination of the report on this department which explains itself.

No unusual amount of serious crime has been called to our attention excepting some burglaries, which in most all cases arrests were made and convictions secured. I wish to thank all officials with whom I have had dealings with, including the reporters for their air treatment in handling department matters.

Respectfully

FRANK E. BURRELL,
Chief of Police

PUBLIC BURIAL PLACES

January 1, 1915.

To His Honor the Mayor of the City of Quincy:—

The Board of Managers of Public Burial Places respectfully present the following report for the year ending December 31, 1914.

The Board organized with Mr. Albert W. Fay as chairman and Mr. John Q. Cudworth as secretary.

The appropriation allowed the department has been carefully expended for the maintenance of Public Burial Places. In addition to the regular work it was necessary to grade more land than in previous years owing to the increased demand for single graves.

There was nearly a thousand lots cared for by this department during the year which shows the interest taken by lot owners thereby adding to the general appearance of the cemetery.

The fence on Valley street will have to be replaced and as it covers a distance of 1360 feet it is impossible to consider doing this under an ordinary appropriation.

A chapel and new receiving tomb are actual necessities which should be considered as soon as possible.

Hancock Cemetery has been cared for as well as possible with the limited amount placed at our disposal.

The resources, expenditures, and receipts of the department are as follows:—

Appropriation	\$5,000.00	
Balance 1913.....	252.94	
Transfer	400.00	
Foundation and Regrading	1,205.10	
Income from Trust Funds	1,447.24

REPORT OF OVERSEER OF POOR

Quincy, Mass., January 1, 1915.

To His Honor the Mayor of the City of Quincy:—

The Overseer of the Poor in compliance with the city ordinances respectfully presents his report for the year ending December 31, 1914.

We have this year had one hundred and thirty-two (132) more applications for aid than in previous years, of this number twenty-five (25) were cases under Chapter 763, Acts 1913, an Act to Aid Mothers with Dependent Children, which means a much larger expenditure than in an Overseer's case. A number of additional cases have applied and have been referred to various charitable organizations of the city for aid or other assistance. This year we have succeeded in finding employment for a number of men and women who would otherwise have come to aid. I wish to thank Mr. Timothy O'Connell who has been most helpful in securing positions at the Fore River Shipbuilding Corporation for our men.

A detailed statement of the cost of the Almshouse and Outside Poor will be found in the following statement.

The following is the financial statement for the year:

Appropriation	\$19,000.00
Balance from 1913	300.78

REPORT OF CITY PHYSICIAN

Quincy, Mass., January 1, 1915.

To His Honor the Mayor of the City of Quincy:

I beg to submit the following report of my services as City Physician for the year ending December 31, 1914, in accordance with the city ordinances.

Visits to City Home	90
Visits to Outside Poor	246
Office visits	29
Cases of childbirth	6
Visits to Police Station	32
Deaths at City Home	1
Deaths of Outside Poor	1

Respectfully submitted,

FRED A. BARTLETT

City Physician

FIRE DEPARTMENT

Quincy, Mass., January 1, 1915.

Hon. Chester I. Campbell, Mayor,
Quincy, Mass.

Dear Sir, — I have the honor to submit the annual report of the Quincy Fire Department for the year ending December 31, 1914.

ORGANIZATION

The department consists of one Chief; three Assistant Chiefs; one Captain; one Lieutenant; one Superintendent of Alarm; thirty permanent men and forty-two call men.

Chief—Faxon Billings; *Assistant Chiefs*—Frank C. Packard, Louis K. Badger and Albert H. Stephenson. *Captain*—Alfred L. Mead; *Lieutenant*—John J. Faircloth; *Superintendent of Fire Alarm*—William A. Gavin. *Permanent Men*—Frank Genero, James Connell, Herbert Griffin, William Carroll, Michael Scully, William Lahey, Richard Williams, Michael P. Barry, John F. Desmond, Edward H. Barry, Murdock McDonald, Myles Creamer, John Deneen, Charles Anderson, Andrew Scully, James F. Malone, Daniel McNiece, James C. Gallagher, Richard Callahan, William J. Sands, Daniel Radley, William Gerry, James P. Dillon, Richard Joyce, Henry M. Hughes, John L. O'Neil, Charles F. Litchfield, Edward F. Lane, Edward A. O'Neil, Faxon Billings.

APPARATUS

Central Station

One steam fire engine with A. & B. Tractor; one combination hose-wagon; one combination ladder truck; one combination auto; one spare hose wagon; one chief's car. Fourteen call men respond to alarms from this station. Alarms answered by Central Station for year 271.

Wollaston Station

One combination ladder truck; one hose wagon. Seven call men respond to alarms from this station. Alarms answered by this station for year, 91.

Atlantic Station

One auto combination. Four call men respond to alarms from this station. Alarms answered by this station for year, 123.

West Quincy Station

One ladder truck; one hose wagon. Seven call men respond to alarms from this station. Alarms answered from this station for year, 82.

Quincy Point Station

One combination hose wagon. Four call men respond to alarms from this station. Alarms answered from this station for year, 58.

Houghs Neck Station

One combination hose wagon. Six call men respond to alarms from this station. Alarms answered from this station for year, 22.

HOSE

Number of feet of hose in the department, 14,500. 3,000 feet in poor condition.

HORSES

There are nineteen horses in the department, some in poor condition.

Alarms

During the year there have been 422 alarms.

Bell alarms	174
Still and telephone alarms	248
False alarms	33

During the year there were

58,630 feet of hose laid
3,209 feet of ladders raised.
4,448 gallons of chemicals used.

Valuations, Insurance and Losses

Total value of property involved	\$615,879.00
Total insurance on same	397,680.00

Losses

January	\$7,773.00
February	20,898.00
March	8,639.50
April	4,350.00
May	9,074.00
June	1,479.00
July	2,443.54
August	1,778.00
September	1,593.50
October	3,740.00
November	3,261.85
December	2,910.00

\$67,950.39

RECOMMENDATIONS

I would recommend that the Captain be made an Acting Chief, and in absence of the Chief, he shall have full powers of the Chief until his return to duty.

I would also recommend that the department be motorized by the addition of some new apparatus each year until completed. Also that, the fire alarm be cut up and a ten circuit repeater installed, and that a fire proof building be built to hold the same.

In conclusion, I wish to thank all City Officials, who have in any way helped me in the discharge of my duties the past year, and I also wish to thank the men of the department for their cooperation.

Respectfully submitted,

FAXON BILLINGS,
Chief Engineer, Fire Department, City of Quincy.

REPORT OF CITY CLERK

I have the honor to submit the twenty-sixth annual report for this department, being for the year ending December 31, 1914.

RECEIPTS

Licenses

Junk	\$260.00
Amusement	497.00
Common Victualler	200.00
Express and Carriage	39.00
Pool and Billiard	188.00

JOHN J. O'HARA,

Collector of Taxes

SEALER WEIGHTS AND MEASURES

Quincy, Mass., February 1, 1915.

Hon. Chester I. Campbell, Mayor,
City of Quincy, Mass.

Sir: — Complying with your request, I beg to submit the following report of the Department of Sealer of Weights and Measures for the year ending December 31, 1914.

TESTING AND SEALING

The law requires that all scales, weights and measures shall be sealed once a year, and that the Sealer shall give annual notice of the same. After giving this notice to all who use weights and measures, if they do not comply with the law by bringing in same, then the Sealer shall go to the houses, shops or stores where the weights and measures are located, adjust and seal the measures, weights or balances if correct, and if incorrect condemn same.

In order to perform this work it is necessary to carry around a number of weights, measures, and various tools to adjust and seal all kinds of weighing devices. This requires means of transportation. In previous years the Sealer has used a team for this work, but the work has increased to such an extent that this means of conveyance is very slow and inconvenient, when it is necessary to travel from one part of the city to another in a day, as very often is the case when the work demands it. It would therefore recommend that the City purchase an automobile for this Department.

TESTING AND REWEIGHING PACKAGES

It is the duty of the Sealer to enter stores or shops and weigh articles that are put up for delivery or sale and ascertain their weight. This is the only protection the public has from merchants who are dishonest. I find most of the merchants, however, are giving full weight. I intend to continue this line of work, as the State Department earnestly recommends it and this year asks for a special report on the same, which they have not done before.

INSPECTIONS OF HAWKERS AND PEDLARS

The local pedlars have given very little trouble during the past year. They bring in their scales to be sealed and are living strictly up to the law in the sale of vegetables and fruits. The out-of-town pedlars, and I am very glad to say they are not as numerous as in previous years, have given some trouble in the past year. In one instance it was necessary to prosecute on four complaints, and a

conviction was secured in each. In some instances I have met hawkers about to enter the City with scales in an unsatisfactory condition and they have complied with my request to leave the City.

INSPECTION OF ICE TEAMS.

Reweighing Ice After Left by Ice Men

This line of work was carried on mostly during the summer months. The results of the weighings were very satisfactory. Short weight was found in only two cases, one for one pound and the other two pounds. In other reweighings the weights were found sometimes from five to eight pounds over.

INSPECTION OF COAL TEAMS

Reweighing of Coal

At different periods during the past year about thirty loads of coal were reweighed and very little shortage was found. In some cases there was an overweight. The public in general knows nothing of this nature of work, and has no idea that a load of coal delivered to them may have been reweighed by the Sealer and found correct or incorrect, as the case may be.

APOTHECARY SCALES AND WEIGHTS

An added duty of the Sealer during the past year was the testing of Apothecary weights. It was the first year that this line of work came under the jurisdiction of the Sealer, and it has taken a great deal of time to perform same. This requires that the weights be brought to the office to be sealed, and in many cases weights were condemned. The glass graduates used by druggists have not been tested as yet, as the dealers in this line have not been able to supply the local Sealers with the proper graduates for testing.

Included in this report are receipts and expenditures of the Department for the past year, together with tables of work done.

I wish to take this opportunity to thank all with whom I have come in contact during the past year, and trust relations will continue as pleasant in the future.

Respectfully submitted,

JAMES M. CANTFILL,
Sealer of Weights and Measures.

REPORT OF DOCK AND WATER FRONT COMMISSIONER FOR THE YEAR 1914

To His Honor the Mayor of the City of Quincy,

As commissioner of Water Front, Waterways and Navigation under your appointment, I beg to submit the following report.

The greatest benefit this section of Boston Harbor has at present is our general natural waterway, Weymouth Fore River and its tributary Town River. None of the great highways that enter our city compare with this waterway in commercial importance.

Commerce is the exchange of commodities on a large scale between individuals, cities or towns, states or nations. Therefore the commerce of Weymouth Fore River must, of necessity consist of the raw materials purchased and brought in by water to the wharves of the different firms doing business on the river and its tributaries, and also of the manufactured products shipped down this river to the sea by these same firms; not including any goods received or shipped by rail, and it is my desire to give you a conservative estimate of this commerce and the effect of the same locally.

There was received on the water front of Weymouth Fore River from Nov. 19, 1913 to Nov. 19, 1914, 163,887 tons coal, lime, cement and miscellaneous, at an average value of \$5.00	\$819,435
Also 6,000,000 feet of lumber, telephone and electric light poles	130,000
	<hr/>
	\$849,435
There was shipped out manufactured products, consisting of yachts, boats, vessels and granite.....	14,240,000
	<hr/>
	\$15,089,435
Add to this the contingent commerce that came into this section by rail to the firms doing business on this river, which amounted to	7,670,000
	<hr/>
	\$22,759,435
The payrolls of the firms doing business on the river amount approximately to	3,565,000
The rail commerce represents purchases in almost every state from Maine to Illinois.	
The city of Boston receives annually for supplies of different kinds	\$1,600,000

The Directors of the Port of Boston have expended \$6,000 improving the channel in the eastern opening of the draw, thus making navigable for large vessels.

QUINCY POINT DRAW

Total number of openings, 985; Total number of craft passing through, 1631, consisting of battleships, submarines, torpedo boats, steamers, schooners, scows, barges, yachts and small craft.

This office has devoted a large amount of time to the work of securing a re-examination of the project to dredge the channel of Weymouth Fore River, to a width of 400 feet and a depth of 24 feet from Sheep Island to Quincy Point Bridge.

This project received an adverse report from the U. S. District Officer Col. Millis, but this office takes great pleasure in reporting that largely through the efforts of your commissioner and Senator John W. Weeks an order was issued to the Army Engineers for a re-examination and a very favorable report has been made for a modification of the project to a width of 300 feet and a depth of 24 feet, and the army engineers recommend a lump sum of \$200,000 be appropriated by the U. S. Government contingent on an appropriation of \$75,000 by the state and \$25,000 by the city of Quincy and the Fore River Shipbuilding Company.

This office recommends the purchase of two locations for Public Landings, now while the land is cheap, one at Squantum and one at the Bit, so called.

Your commissioner attended all the hearings at the State House and before the Directors of the Port, that related to Quincy's waterfront, and assisted Col. W. E. Craighill the U. S. District officer in holding a hearing at the Quincy Yacht Club House. Also personally interviewed the U. S. District officers at New York, Wilmington, Del., Baltimore, and Washington, in regard to the improvement of Weymouth Fore River channel.

Respectfully submitted,

FRANK FESSENDEN CRANE,

Commissioner.

ASSESSORS' REPORT

Quincy, Mass., January 1, 1915.

To His Honor, the Mayor and the City Council:—

The following is submitted as the report of the Board of Assessors, for the year 1914.

Warrants received and amounts raised for the current expenses by the assessment of taxes in the City of Quincy, for the financial year commencing January 1, 1914, were as follows:

A state warrant for the proportion of Quincy..... \$68,250.00

A County warrant for the proportion of Quincy of a
County tax of \$250,000 26,139.41

By the provisions of Chapter 488 of the Acts of the year 1895, entitled "An Act to provide for a Metropolitan Water Supply," Chapter 453 of the Acts of the year 1901, entitled "An Act to provide for additional Metropolitan Water Loan," we were assessed for..... 51,469.66

Of this amount \$6,640.10 is to meet the requirements of the sinking fund established under said chapter; \$34,222.36 is to pay interest and \$10,522.68 is on account of the cost of maintenance and operation.

By the provisions of Chapter 406 of the Acts of the year 1895, entitled "An Act to provide for a system of sewerage disposal for the Neponset River Valley" and Chapter 424 of the Acts of the year 1899, entitled "An Act to provide for the construction of a high level gravity sewer for the relief of the Charles and Neponset River Valleys," we have been assessed..... 29,125.39

Of this amount \$79.89 is to meet the requirements for maturing serial bonds; \$1,297.94 is to pay interest, and \$1,727.07 is on account of the cost of maintenance and operation.

In accordance with the provisions of Chapter 407 of the Acts of the year 1893, entitled "An Act to establish a Metropolitan Park Commission," Chapter 550 of the Acts of the year 1896, entitled "An Act relative to the Metropolitan Parks and Boulevards," and Chapter 464 of the Acts of the year 1899, entitled "An Act to authorize the Metropolitan Park Commission to take control and manage Nantasket Beach and adjacent land and waters," we have been assessed..... 23,998.29

Of this amount \$2,161.87 is to meet the requirements of the sinking fund established under said chapter, \$9,092.88 is to pay interest, and \$12,622.23 is on account of the cost of maintenance and operation; \$121.31 is to meet the requirements for maturing serial bonds.

In accordance with the provisions of Chapter 465 of the Acts of the year 1903, entitled "An Act to authorize the construction of a dam across the Charles River between the cities of Boston and Cambridge and all acts in addition and amendment thereof, we have been assessed in addition to the amount to be assessed for the State Tax, the sum of \$3,104.90

Of this amount \$79.89 is to meet the requirements for maturing serial bonds; \$1,297.94 is to pay interest, and \$1,727.07 is on account of the cost of maintenance and operation.

In pursuance of the provisions of Section 16, Chapter 47 of the Revised Laws (State Highway Tax), we have been assessed 101.92

In accordance with provisions of Chapter 598 of the Acts of the year 1910, entitled "An Act relative to the auditing by the Director of the Bureau of Statistics of municipal accounts," and any and all acts in addition and amendment thereto, you are, in the name of the Commonwealth of Massachusetts, required to assess, in addition to the amount to be assessed for the State Tax, the sum of.....

Amount raised for municipal current expenses	343.65
City sewer, less receipts	474,010.40
City debt	37,760.50
Interest city debt	145,695.00
Street improvement debt	24,297.99
Interest street improvement debt	7,300.00
Park debt	2,564.50
Interest park debt	2,000.00
Interest temporary loans	800.00
	17,500.00

Aggregate of amount \$711,928.39

11,616 polls at \$2.00 each, were recorded for assessment and included in the estimate that determined the rate of taxation 23,232.00

An additional assessment of 233 polls which was omitted at the annual assessment of taxes was made December 20, 1914, making the number assessed 11,849, excluding 76, which are exempt under provisions of Chapter 367, Acts of 1907. To which was added for overlay, as provided in Chapter 12, Section 55, R. L. 10,164.22

Ward 6.....	864	713	1,577

The personal property consisting of horses, carriages and cows, assessed by the assistant assessors, is as follows:

Ward 1, \$216,325; Ward 2, \$70,550; Ward 3, \$79,750; Ward 4, \$72,200; Ward 5, \$138,525; Ward 6, \$61,825. A total of \$639,175.

The number of dogs returned by the assistant assessors is as follows:

	1	2	3	4	5	6	Total
Male	181	131	115	169	132	175	903
Female	25	13	3	16	20	35	112
Kennel				1		1	2

The total number of individual accounts kept in this office is as follows:

Main sewer assessments	1,674
Particular sewer assessments	581
Street sprinkling	1,526
Sidewalk Assessments	85
Street betterment assessments	297
Gypsy and brown tail moths	967

Respectfully submitted

WILLIAM L. BUCKLEY,
ERIC G. BERGFORS,
CHARLES R. SHERMAN,
Assessors of the City of Quincy

REPORT OF PARK COMMISSIONERS

To His Honor the Mayor:—

Dear Sir:— The Board of Park Commissioners submit the following report for the year 1914:—

We started in February to clear the brown-tail and gypsy-moths from our parks, and found not over one-half as many as usual, owing to the thorough work done the past two years.

We had the pleasure of voting to allow the United States to use Merrymount Park for drilling troops in case they should be needed for service in Mexico.

The Bath-house was opened June 1st and we had a very large attendance, considering the cool weather. We feel sure that within a very few years we should make a substantial addition as we are over-crowded every warm Saturday and Sunday. We closed the house about September 15th.

The work on the two Supervised Playgrounds was very successful. We thought best to discontinue using our supervisors at Ward Four and placed them at Ward Two, which was very satisfactory to the Board. Ward Three Playground was very largely attended, as usual.

Two sessions were held each day and one afternoon each week, special athletic events were held for both boys and girls. Prizes were given at the end of the season on "Closing Day" to the winners of the first three places in each division.

Baseball Leagues for the boys with games between the various playgrounds weekly, and different events for the girls kept up the competition interest.

At the "Closing Day" exercises held at Merrymount Oval on Thursday afternoon, August 27th, over five hundred took part in the events. The girls gave excellent demonstration of the various dances, while the boys did fine work in athletic games and races.

ATTENDANCE

Ward 2, Boys	5,060
Ward 2, Girls	3,657
Ward 3, Boys	7,064
Ward 3, Girls	6,872
Ward 5, Total Boys and Girls	5,705

28,358

We opened the Playgrounds July 6th and closed them August 29th.

We had to stop our two laborers clearing up the parks far too early as our funds were getting low.

We recommend to the in-coming Board that they secure funds to build a dressing-room in Merrymount Park to accommodate visiting teams; also, to have the telephone placed in the Bath House at

Quincy Point early next season, as it is much needed in case of accident or sickness. We also recommend that Atlantic (Ward Six) and Ward One have supervised playgrounds.

We issued a very large number of permits to Base Ball and Foot Ball Teams, also, for many picnics.

I believe the Parks and Playgrounds were used more than ever before and the season, we believe, was, on the whole, a success.

BOARD OF PARK COMMISSIONERS,

IRA M. WHITEMORE,

Chairman

REPORT OF BOARD OF HEALTH

January 1, 1915.

To His Honor the Mayor of the City of Quincy.

The Board of Health respectfully submit the following report for the year 1914.

The organization of the Board was as follows:—

John C. Murray, Chairman,
John T. Reynolds, M. D., Secretary,
Thomas L. A. Musgrave.

The Inspectors of the Board remained as in the past, viz.,

Edward J. Lennon, Sanitary Inspector;
J. J. Keniley, Inspector of Plumbing,
James F. Allan, Inspector of Meats and Provisions,
Daniel Scouler, Jr., Inspector of Milk,
Francis Abele, Jr., V. S., Inspector of Slaughtering,
James F. Allan, Inspector of Slaughtering.

The appropriations and expenditures of the Board during the past year are shown in the following table:—

<i>Account</i>	<i>Appropriation</i>	<i>Expenditure</i>	<i>Balance</i>
Care of Brooks	\$800.00	\$800.00
Clerical Services	676.00	670.00	\$6.00
Contagious Diseases	16,607.22	15,818.12	789.10

The work of the Board has been carried on this year in much the same manner as in the past. Meetings have been held at intervals, subject to the call of the chairman. The cost of collecting the refuse this year has amounted to \$19,928.09. The cost of this work necessarily increases each year on account of the large number of new buildings erected which require ashes and garbage removed. In the early part of the year the charge for the removal of barrels of ashes from cellars was raised from five cents to seven and one-half cents. The Board would recommend that two double ash carts be purchased this year. We have found that double ash carts are much more satisfactory for this work than single carts. The receipts from the sale of ash tickets this year has been \$482.51. The collection of garbage has been carried on the same as in the past. The receipts from the sale of garbage have amounted to \$2,443.16. We would recommend that another garbage wagon be added to the equipment of this department. The payrolls of the different departments have been as follows:

Ashes	\$4,120.00
Garbage	7,770.38
Scavenger	2,961.68

The appropriation for cleaning brooks was \$800.00. This was an increase over last year. The total amount has been expended and the brooks placed in a sanitary condition. This year the Board was compelled to send a large number of cases of contagious diseases to the hospital. This necessitated the Board asking for a supplementary appropriation. The Pest House is in need of some repairs and this work should be done at an early date.

Respectfully submitted.

JOHN C. MURRAY, *Chairman.*
JOHN T. REYNOLDS, *Secretary.*
THOMAS L. A. MUSGRAVE,
BOARD OF HEALTH.

REPORT OF INSPECTOR OF PLUMBING

To the Board of Health,

January, 1, 1915.

Gentlemen: As Inspector of Plumbing I have the honor to submit my twenty-first annual report.

Number of Permits issued	683
New Dwellings	247
Old Dwellings	221

New Beach Cottages	51

Pool Room	1
Restaurant	1
Business Block	3

The order presented by the Board to the City Council asking that a charge be made for all permits to perform plumbing work and which failed to pass, should in my opinion, again be presented to that body and with proper explanation why a charge should be made, I can see no reason why this order should not pass. I consider that for the small amount paid to the City for a permit the owner is receiving protection on quite often large amounts for a very small percentage. A charge is made by some cities for a permit and I can see no reason why this system should not be put in force in this city and it would reimburse partly for quite an expense that this work entails. It would also have a tendency to place a little more importance upon the privilege granted and would in a great measure put a stop to granting permits to people who have no intention of doing the work but file the application to hold off the order of the Board of Health to abate a nuisance. This is annoying to this department and delays the prompt enforcement of health laws.

The revised plumbing ordinance which has been in force during the year has, I think, met with the approval of the plumbers in general and the people who have had occasion to have plumbing installed. The plumbing work performed has in general been installed in a satisfactory manner with but very few complaints.

Respectfully submitted,
J. J. KENILEY

Inspector of Plumbing.

REPORT OF INSPECTOR OF MILK

To the Board of Health, Quincy, Mass., January 1, 1915.

Gentlemen:—It is estimated that there are 7,300,000,000 gallons of milk produced annually in the United States. While this figure seems large, it only allows for six-tenths of a pint of milk to each individual. Milk in New England forms about 16 percent of the total food of the average American family. While adults consume a large quantity of milk, infants and children use the greater portion, as milk is the principal article of diet up to five years of age.

Of this enormous quantity of milk produced, Quincy consumes daily about 11,400 quarts, supplied by 44 milk-men who deliver direct to the consumer or through the 121 stores licensed to sell milk.

Milk which upon analysis is shown to contain less than 12.15 percent of milk solids or less than 3.35 percent butter fat shall not be considered of good standard quality. Milk must comply with the above law, and must also be clean and wholesome, complying as well with the regulations of the local Board of Health, which require that no milk shall contain more than 500,000 bacteria per cubic centimeter, nor have a temperature higher than 50 degrees Fahrenheit. (See regulation Number 49.)

The yearly average of milk consumed was 3.80 per cent for butter fat, 12.92 for milk solids and 340,000 bacteria per cubic centimeter. No preservatives and coloring matter was found.

There seems to have been during the last year among the local dealers a growing disregard of Section 3, Chapter 435, Acts of 1903. I would urge all dealers to observe this law. There is an association whose object is to exchange stray bottles and I would suggest that all dealers look into this matter.

During the past year inspections of dairies and stores have been made, and with few exceptions conditions have been found satisfactory.

Number of licenses to peddle milk	44
Number of licenses to sell milk	121
Amount turned over to Treasurer for license fees ...	\$82.50

For tables showing receipts and expenditures of this department, see auditor's report.

Respectfully submitted,
DANIEL SCOULER, JR.,
Inspector of Milk.

REPORT OF SCHOOL PHYSICIAN

To the Board of Health,¹ Quincy, Mass., January 1, 1915.

LORA C. MERRILL,
Inspector of Buildings

REPORT OF CITY ENGINEER

To His Honor, the Mayor of the City of Quincy,

I respectfully submit the fifteenth annual report of the Engineering Department for the year ending December 31, 1914.

The annual appropriation has been expended as follows:

Appropriation	\$2,500.00	
Balance of 1913	17.51	
	-----	\$2,517.51

Expended

Pay Rolls	\$1,953.91	
Supplies	525.33	
Miscellaneous	34.39	
	-----	\$2,513.63

Balance		\$3.88

The following is a statement of the work done by the department during the year.

At the request of property owners on accepted streets, street lines and grades have been given in front of 95 estates.

Plans and estimates have been prepared for the City Council or Council Committees as follows:

Proposed street widenings	3
Acceptance of Private Ways	20

The following streets have been laid out during the year as public highways of the City.

STREETS LAID OUT DURING YEAR

<i>Name</i>	<i>Location</i>	<i>Ward</i>	<i>Length</i>	<i>Width</i>
Apthorp Street	Billings Road to Quincy Shore Reservation	6	921.85	40
Davis Street	near Staunton Street to Mason Street	5	1,173.98	40
Dysart Street	Elm Street to Glencoe Place	2	838.10	35
Edison Street	Farnum Street to Bay View Street	2	197.32	33
Federal Avenue	Independence Avenue to Field's Land	3	878.00	40
Glendale Road	Goffe Street to Upland Road	1	216.00	40
Greene Street	Elm Avenue to Waterston Avenue	5	617.82	40
Hamilton Street	Cummings Avenue to Billings Road	5	540.00	40
Huckins Avenue	East Squantum Street to Bellevue Road	6	1,615.00	40
Montclair Avenue	West Squantum Street to Harriet Avenue	6	1,573.00	40
Ocean Street	East Squantum Street to Quincy Shore Res.	6	1,076.50	40
Park Lane	Greenleaf Street to Butler Road	1	702.17	40
Phillips Street	Elm Avenue to Waterston Avenue	5	766.37	40
Roselin Avenue	Whitwell Street to Euclid Avenue	1	691.00	40
Winthrop Street	Sea Street to Chatham Street	1	1,040.00	40
Saville Street (Footway)	Upland Road to Goffe Street	1	224.00	30

13,071.11 feet or
2.475 miles

Goffe Street was widened at its intersections with Adams street thereby improving a very dangerous intersection.

COMMISSIONER OF PUBLIC WORKS

Lines and grades have been given for construction work as requested by the Commissioner.

All new streets built during the year have been laid out by this department. Lines and grades have been given for the widening of Hancock Street between Granite Street and School Street. Walls, fences and edgestones have been moved back to conform to the new street lines.

Plans and specifications have been prepared for the following work which has been done this year by contract: —

- Grading New Adams School Lot.
- Construction of Granolithic Steps — Saville Street.
- Re-grading the south easterly roadway of Elm Avenue.
- Construction of Greene Street.
- Construction of Phillips Street.
- Construction of Huckins Avenue.
- Construction of Ocean Street.
- Paving Penn Street
- Construction of Stone Culvert, Winthrop Street.

3,022.8 square yards of granite block paving have been laid on Penn Street between Liberty Street and Columbia Road, a distance of about 963.0 feet.

Paved gutters have been constructed upon the following streets: —

PAVED GUTTERS

<i>Street</i>	<i>Side</i>	<i>Location</i>	<i>Sq. yds</i>
Cranch Street	Easterly	Deldorf St. to Whitwell St.	503.00
Cranch Street	Westerly	Deldorf St. to Klondike St.	223.00
Federal Avenue	Both	Independence Ave. to Verchild ..	344.00
Glendale Road	Easterly	Whitwell St., Northerly	180.00
Grove Street	Northerly	Forrest Ave., Easterly	340.00
Roselin Avenue	Both	Whitwell St. to Euclid Ave.	407.31
Rogers Street	Both	Hall Place, westerly	430.24
Whitwell Street	Easterly	Granite St. to Glendale Road ...	320.00
Total			2,747.55

SURFACE DRAINS

Grades have been given and record plans have been made of drains for surface water as follows: —

SURFACE DRAINS

Street	Location	Length of Pipe			Catch Man		
		24"	18" 15" 12"	10"	8"	Basin	Holes
Bates Avenue	From near Willard Street, westerly		212		45		3

SEWER DEPARTMENT

Lines and grades have been given for the construction of 3.49 miles of sewers laid during the year.

Assessment and record plans for this work have been made and filed with the Sewer Department. There are on file at present 567 sewer assessment and record plans.

MT. WOLLASTON CEMETERY

Grades have been given for re-grading portions of the Mt. Wollaston Cemetery as requested by the Superintendent. A portion of the land purchased last year for the enlargement of the cemetery has been re-graded and divided into burial lots.

BUILDING INSPECTOR

This department has checked sizes of members in proposed buildings and foundations as requested by the Inspector of Buildings.

CITY SOLICITOR

Surveys and plans have been made for accident cases and claims filed against the city as requested by the City Solicitor or Chief of Police.

The City Engineer has attended Court sessions and Legislative hearings when necessary.

ASSESSORS' PLANS

The Assessor's plans have been corrected to agree with transfers of property made during the year.

New buildings have been measured and plotted.

HOUSE NUMBERING

House numbers have been assigned to new buildings when located.

Respectfully submitted,

EZEKIEL C. SARGENT,
City Engineer.

COMMISSIONER OF PUBLIC WORKS

1914

To His Honor, the Mayor of the City of Quincy.

Sir: I herewith submit the annual report of the Department of Public Works for the year 1914.

For a detailed account of the expenditures of the departments under my control, I would refer to the itemized report of the City Auditor, and I simply present the table showing appropriations, expenditures and balances.

	<i>Net Appropriations</i>	<i>Expen- ditures</i>	<i>Balances</i>
Clerical	\$ 810.00	\$ 810.00

STREETS BUILT IN 1914

Tarvia Bound

Apthorp Street from Billings Road to Boulevard.
 Davis Street from near Standish Street to Mason Street.
 Dysart Street from Elm Street to Glencoe Place.
 Elm Avenue, south side, from Hancock Street to Huntington Square.
 Glendale Road from Goffe Street to Upland Road.
 Green Street from Elm Avenue to Waterston Avenue.
 Hamilton Street from Everett Street to Billings Road.
 Phillips Street from Elm Avenue to Waterston Avenue.
 Park Lane from Greenleaf Street to Butler Road.
 Roselin Avenue from Whitwell Street to Euclid Avenue.

Subgraded

Ocean Street from East Squantum Street to Boulevard.
 Federal Avenue Extension from Independence Avenue southerly.
 Huckins Avenue, gravel from East Squantum to Bellevue Road (unfinished)
 Winthrop Street, partly subgraded.

OLD STREETS REBUILT

Tarvia Bound

Quincy Avenue from Scammell Street to Water Street.
 Bennington Street from Verchild to High Street.
 Elm Street from Hancock to Washington Street.
 Scammell Street from Quincy Avenue to South Street.
 Willard Street from West Street to Furnace Brook Parkway.
 Washington Street from Edison Street to North Street.
 City Square from Temple Street to Chestnut Street (East side).
 Adams Street from Milton to Beale Street (on account of Water Main).
 Grove Street from Railroad tracks to 300 feet southerly.

STREETS WHICH HAVE BEEN RESURFACED OR HAD SUBSTANTIAL REPAIRS

Whitwell Street, macadam — from Granite Street to Glendale Road.
 Adams Street, Hancock Street to Newport Avenue macadam sealed with Tarvia B.
 Newport Avenue to Furnace Brook — gravel.
 Webster Street from East Squantum Street to Boulevard — gravel.
 Billings Road, East side, from Hancock Street to Calumet Street — gravel.
 Lincoln Avenue from Newport Avenue to North Central Avenue — gravel.
 Winthrop Avenue from Lincoln Avenue to South Central Avenue — gravel.
 Sea Street from Shelton Road to Willows — gravel.
 Willard Street from Crescent to Rogers street — stone chips — gravel.
 West Squantum Street — gravel.
 Valley Street from Coddington Street to Greenleaf Street — gravel.
 Fenno Street from Hancock to Boulevard — reshaped.

Monroe Road — Goffe Street to Fairmount Way — macadam Standard Oil No. 4.

Penn Street paved with grouted granite block from Liberty to Columbia Street.

Saville Street Footway — constructed.

Goffe Street widened at Adams Street.

Hancock Street widened from Granite Street to School Street.

GYPSY MOTH DEPARTMENT

Appropriation	\$7,026.82
Expenditures	6,797.14
	<hr/>
Balance	\$229.68

This appropriation is not wholly used to fight the Gypsy and Brown Tail Moths, but the various diseases which do not come under the statute law.

The principal calls are for the destruction of the Elm Leaf Beetle, Tent and Forest Caterpillar, Leopard Moth, and the Scale.

Our Street Trees show a decided improvement, and the residential sections and woodlands have been improved by spraying, and the removal of dead trees and undergrowths along the public highways.

I would recommend the purchase of another high-powered sprayer, as one broke down last spring, which necessitated working the men in two shifts from 3 A. M. to 8 P. M.

The demands of the Public are increasing so greatly that one sprayer will not be able to do the work in the future.

Balance from 1913 Appropriation	\$18,183.51	
Expended	18,183.51	
	<hr/>	

During the year extensions of mains have been made in 78 streets, the sizes of pipes laid being from four inches to ten inches. The total amount of pipe laid was 26,711 feet, 47 hydrants were set making the total number now in use 1041. 83 water gates were set making the total number in use 1768. 400 services were installed making the total number in use 8990. The cost of these services was \$10,096.04, divided as follows; cost to the city \$4,256.82, to the owner of the property \$5,839.22. 690 meters were set on old and new services making the total number in use 8065.

The water tower at Great Hill, Hough's Neck, was erected by Chicago Bridge and Iron Company at a cost of \$20,000.00. It was finished and put into service August 1, 1914.

The tank is 146 feet high and has a capacity of 400,000 gallons. It acts as a reserve supply for the district.

Approximately two miles of pipe has been relaid, the sizes removed being from 2 inch to 6 inch which was replaced with sizes running from 6 inch to 8 inch.

For further detail see the accompanying tables.

Balance	\$152.37

Clerical

Appropriation	\$780.00
Expended	780.00

PARTICULAR SEWERS

Three hundred and sixty connections were made with the public sewer during the year 1914 to care for the drainage from three hundred and seventy buildings. At present about 85 per cent of the buildings available to the public sewer have been connected with it.

The following tables show the distribution, cost per foot, cost per connection and classification of the work done this year.

By Wards

Wd. 1	Wd. 2	Wd. 3	Wd. 4	Wd. 5	Wd. 6	Total

Total	370 buildings		

ASSESSMENT AND RECORD PLANS

The City Engineer has prepared record plans of the work done by this department and placed them on file in this office. The assessment on account of sewer construction is now being made.

The following table shows the location, size, length of sewers, number of manholes and material encountered in the construction of sewers during the year 1914.

CLASSIFICATION

<i>Ward</i>	<i>Location</i>	<i>From</i>	<i>To</i>	<i>Size</i>	<i>Feet</i>	<i>Man hole</i>	<i>Material</i>

					<hr/>		
					18,428.14 ft. 86 manholes		

3.49 miles of sewer built during 1914 and 86 manholes making a total to date of 72.67 miles of sewer with 1,668 manholes.

Respectfully submitted,

MOSES L. BROWN,
Commissioner of Public Works

REPORT OF CITY SOLICITOR

Quincy, Mass., February 1, 1915.

As in previous years, various claims have been made against the city, in most instances for damages arising from alleged defects in the highway. In a few instances where it has been deemed for the best interest of the city, these claims have been adjusted. During the past year, however, there has been but one case against the city brought to trial, namely, that of Catherine H. Coleman. This case, which had been pending since 1910, was based on a claim for damages for personal injuries arising from an alleged defect in the highway. After a jury trial in the Superior Court for Norfolk County a verdict was rendered in favor of the city. Of other cases pending against the city at the beginning of the year some have been settled, some have been dismissed for lack of prosecution, and a few are still pending.

At the beginning of the year 1914 the matter of the petition of the Directors of the New York, New Haven & Hartford Railroad for the abolition of grade crossings in Quincy was pending in the Superior Court for Norfolk County. The Special Commissioners, John L. Bates, Winfield S. Slocum, and Arthur H. Wellman, who had been appointed by the Court to report a plan for abolishing the grade crossings, had filed their decision and report. On February 5, 1914, the Public Service Commission approved the plan reported by the Special Commission and consented to the proposed change of grade. On February 27, 1914, the decree of the Court confirming the report of the Special Commission was entered.

It has been my practice to be at the City Hall every morning to attend to the duties of the office and to confer with the heads of the various departments in relation to the affairs of their respective offices when so requested.

The titles to the various parcels of land acquired by the City during the past year and also the titles to the various parcels of land upon which the Managers of the Woodward Fund and Property have taken mortgages have been examined.

I have attended all the meetings of the City Council and, whenever requested, the meetings of its several committees and have rendered them such assistance as I could. I have also attended many hearings before Committees of the Legislature and various State Commissions whenever matters affecting the interests of the City were being heard.

In the year 1914 the following special legislation affecting the City of Quincy was enacted by the Legislature:

Resolves, chapter 45: Resolve to provide for the removal of certain objectionable material from a part of the Quincy Shore Reservation.

Acts, chapter 106: An act to authorize the City of Quincy to reward James R. Qualey and Patrick A. Milford for their services in finding the body of Louis G. Restelli.

Acts, chapter 704: An act to establish a Board of Survey for the City of Quincy.

WALTER L. PINKHAM

City Solicitor

West Quincy and Atlantic Reading Rooms, daily (except Sundays and holidays), 3 to 5.30 P. M., and 6.30 to 8.30 P. M. Closed Fridays at

6 P. M.

*Resigned

REPORT OF THE TRUSTEES

To His Honor the Mayor of the City of Quincy: —

The Trustees of the Thomas Crane Public Library submit herewith their 44th annual report of the Library.

The results of the year's work in growth and usefulness are very gratifying as shown in detail in the Librarian's report which follows.

The Atlantic Branch, outgrowing its quarters, has been moved to a more central location. The building is new, light, airy and sanitary, and at very satisfactory terms we have taken a lease of the building for five years with an option of five years additional.

The growth of the Library should be commensurate with the progress of the city. In our rapidly increasing and widely scattered population we see new trenches to take and greater heights to surmount.

The Trustees earnestly desire to open a third branch reading room at Quincy Point or Wollaston this year. We realize that our wants are sempiternal, but to come into line with the most advanced ideas in library management, provision should be made for placing the resources of the Library nearer the homes of the people.

We reiterate the hope expressed in our last annual report: — for Branches owned by the City; a suitable building on the Library grounds to be used for a lecture hall, story hours, exhibitions and training school for apprentices.

While the duties of the Librarian and staff have become more arduous with extended hours and Sunday openings, they have been discharged in the same efficient and acceptable manner.

All of which is very respectfully submitted,

For the Trustees,

CHARLES R. SAFFORD,

Chairman

ALBERT N. MURRAY,
Treasurer

Approved
H. O. FAIRBANKS,
Auditor of Accounts
MARCH 5, 1915

REPORT OF LIBRARIAN

Quincy, Mass., January 1, 1915.

To the Trustees of the Thomas Crane Public Library:

I have the honor to present herewith my report for the year ending December 31, 1914.

While the year just closed has been one of general progress a few salient points stand out deserving of special mention. These are the removal of the Atlantic reading room, the purchase of two extra copies each of books added to the children's room to help feed the insatiate demands of the branch reading rooms, the increase of assistants' salaries, the establishing of a reference desk in the Main hall reading room with a special assistant in attendance daily afternoons, the change to the purchase of Library of Congress cards from previously typewriting them for the card catalog, and the opening of the Main hall to readers Sunday afternoons. But by far the most stupendous undertaking to which we are committed is the reclassification of the entire library, under the charge of Miss Ruth Alexander.

Atlantic Reading Room

Although the increase in circulation has continued from all the loan desks, the gain at the Atlantic reading room of 7,679 has exceeded all expectations. This result has been reached by a steady increase month by month over 1913, amounting to 3,766 during the first seven months of the year and 3,913 during the last five, or since its removal to a more central location and to one large room better fitted to the purpose. The average daily circulation has increased from 86 to 102, and only eleven books are missing at the end of the year. The cost of maintaining this reading room the past year, including the moving and necessary refurnishing, has been \$1,363.98.

West Quincy Reading Room

The proportionate increase of circulation from the West Quincy reading room was not attained in 1914, the year showing a gain of only 252; but increased reference work for school pupils is growing to be an important feature in the daily work. Besides these questions, come requests for pictures from both teachers and pupils, and 210 have been mounted and circulated since September.

Children's Room

In June, after Miss Brackett left us we were fortunate in securing the services as children's librarian of Miss Mary K. Weston from the Greenfield Public Library. There were continued gains in circulation here from February until the last two months of the year, when there was a surprising falling off, to be accounted for perhaps by the beautiful weather and good skating. There was, however, a total gain during the year of 1,806 loaned from this room. During the summer the children enjoyed the pleasurable competition of the "Vacation reading." Each boy and girl who entered the contest agreed to read at least five from some four hundred carefully selected volumes. Fifteen children read the required number or more, and the result of the contest was that many, although they did not do that, continued coming to the library

taking other books and magazines, thus making the circulation remarkably good during the summer months, which showed a gain of 951 during July and August.

The younger children have enjoyed the free access to the picture books in the new case near their reading table, and the dissected maps and puzzles which have been donated are very popular.

A few beautifully illustrated and bound editions of children's books, some old favorites and some seeking favor, were on exhibition in this room for several weeks before Christmas, the purpose being to give suggestions for Christmas book buying. Judging by the number of visitors this privilege was appreciated.

Main Hall

Although no statistics of readers are kept it has been noticed this winter that more men are using the reading room during the day, presumably out of employment this hard year. Besides the special collection of books, — on the European war, education, for the study clubs, High School pupils, Italian readers, etc., placed on shelves in the reading room, 10,477 volumes of fiction have been put on the open shelves, not including all new books added, both fiction and non-fiction. Books reported missing from the open shelves here are 28 fiction, four non-fiction, and two reference books. But worse than all else is the deliberate mutilation of art magazines and others placed upon the periodical cases. The following periodicals were added to our subscription list the past year: the Unpopular Review, Life, the Automobile, the Annals of the American Academy of Political and Social Science, the Times History of the War, and the Third Hill Searchlight. Many words of appreciation come from members of study clubs and others of helps in their use of the wealth of material in the library through the newly established reference department, and it may easily be seen that this takes the time of one assistant. To the music collection 31 books have been added, making a total of 115 which have circulated 912 times. The important gift of the year was the large quarto volume, "The Old Silver of American Churches," from Mr. Charles Francis Adams, now of South Lincoln, who, by the way, is the only one living of our first Board of Trustees, and was its Chairman for nineteen years.

Distributing Agencies

A little improvement has been made in the weekly distribution of books to patrons at Wollaston and Norfolk Downs by means of the delivery baskets now that the persons at whose stores the baskets are left are paid a small sum for exercising some care over them. But this improvement still leaves such service a very unsatisfactory method both to patrons and the library, which shows the need of Branch reading rooms. From the Central library to the two Branch reading rooms, books requested are delivered three times a week, 895 books having been sent to Atlantic and 382 to West Quincy.

Work with Schools

Besides what little we have continued to do we feel that there should be a closer connection between the two educational institutions of the city, the schools and the library, to be brought about by co-operation

between teachers and librarians. While there is a continued increasing use of the library by High School pupils that is gratifying, showing the acquired "library habit," we feel that we cannot do any adequate work such as we might do if we had duplicates of books enough to form small collections for collateral reading, to be placed on deposit in the grade schools for a longer or shorter time as they might desire, as many libraries do. We also want to stimulate the teachers in the use of the library by calling upon its resources in advance of their need of material, when here is material and willing workers to supply it.

Books in Foreign Languages

The Free Public Library Commission asks among other questions "What effort has been made to reach your foreign population, and with what results?" The circulation of Italian books was 262 at the Central Library, increased from 96 the preceding year, and 268 at West Quincy, which shows what we could do with more books in that language. Our French collection certainly needs some new titles; and undoubtedly we could use Swedish, Polish and German books if we had them. Six books in Spanish have been loaned sixty times.

Story Hours

Four story hours have been held at the Atlantic reading room during the year, three at the old location, between 30 and 40 children crowding the rooms, and one at the new reading room with 130 present. Two particularly interesting story hours were those given in the Children's room, one just before Thanksgiving, the other before Christmas. At the time of the Christmas gathering the room was bright and attractive with two real Christmas trees, evergreen and immortelles, and scarlet bells hung from the new electric fixtures. In this appropriate setting Miss Ella Packard, one of our assistants, told stories that all children should know and love, in such a manner that, of her audience of 50 children, many then or later wanted the books themselves.

Sunday Opening

The reading room of the Central library has been open seven Sunday afternoons beginning November 15, from 2 until 6 o'clock P. M. Like many new things it started off with a good patronage which dwindled down to the few who seem to appreciate the privilege, to which number we hope will be added others during the season. The average number of readers has been 37. These include few who do not come weeks days, and 35 per cent have been High School pupils.

Staff

We are fortunate after previous experiences, to have had this year but one resignation from the staff besides the aforementioned, Miss Follansbee leaving us in May to work for the Free Library Commission. In September, Miss Whittemore, Miss Kingsbury and Miss Prout were added to the staff, and since their return to their work at the library is shown the great value to them of the course at Simmons College, supplementing their training here. The results gained are the broader viewpoint, more interest in library work, and the spirit of co-operation, these all making for greater efficiency.

Building

The addition of the two periodical cases in the Main hall makes us wonder what we did without them before. The indirect lighting is a great success in the Children's room and at the desk in the Main hall. Now we desire only an open shelf book room, by the addition of display cases, to be fully equipped and up-to-date as are other modern libraries (hoping this will be a help toward making a better class of books read) this library having been built at the time when the much mooted question of open shelves was just being advanced.

Reclassification

We are giving as much time of our assistants as we can spare from the regular work, to Miss Alexander and her boy helpers in the mechanical part of the change from the old method of classification to the Dewey decimal system, which puts all the books on a certain subject together and in alphabetical order. The work on the non-fiction of the Children's room, begun in October, is practically finished. Some idea of the extent of the labor connected with the process of reclassification of the entire library will be understood by the fact that, in connection with the mechanical labor alone, it is estimated roughly that it will take one and one-half years to change the book numbers on the card catalog cards of the non-fiction circulating volumes. As to the numbers on the books themselves, once on, they stay, being put on with white ink, sometimes upon a coating of black India ink, and shellacked over. No more trouble with labels. We are happy that in this reclassification of the books our dream of years, ever since the building of the addition, is at last beginning to come true. It is a matter of regret that the publication of the special lists has had to be discontinued, both on account of lack of time and the change of the call numbers. We published but two last year, — Agriculture and Choice of a Career, which latter was distributed in the High School.

Co-operation

The key-note of the present work in libraries seems to be co-operation. And that co-operation is economy of effort and makes for efficiency; and is shown, for instance, in the catalog department by the purchase of the Library of Congress cards. So much of the work has been done for all libraries by one large library that, with slight alterations when necessary of date, publisher, etc., and the type-writing of our subject headings on each of the cards required for a single book, we get greater accuracy and fulness, the cards, are put out more quickly, the printed cards remain clear longer, and the cost is less. Of course there is the systematizing of the ordering, keeping accounts, etc.

In pursuance of this policy of co-operation the libraries of Massachusetts have been divided into small groups with some one prominent library as a centre, the librarian of which serves as local secretary for the group and thus becomes the connecting link between the Commission and these libraries. There are possibilities of mutual helpfulness through discussions of problems, visits, etc. The Quincy library group includes Avon, Braintree, Holbrook, and Randolph. Their librarians were invited to meet here, books have been loaned, lists of

books given, the librarian has visited each of the libraries and has called the attention of the Commission to the needs of one of them.

I have tried to show how we have been more than busy the entire year, trying with too small income to meet the ever increasing demands of the public, trying to keep pace with the needs of the study clubs, schools, fiction readers, (supplying the latter with fairly clean books), laborers, mechanics, technical students, and foreign craftsmen. From this report, much in detail, it may be seen that the carrying on of these many activities is responsible for the yearly increases in our demands upon the City Treasury. Our needs are almost unlimited, but our fulfilment has to depend upon our limited resources, necessarily so when every other department of the city is growing. The library has never overrun its appropriation. It may be asked how we can come out even, leaving no balance. Easiest thing in the world, with books always waiting at our elbow which the people have asked for and we have had no money to buy — always the demand in excess of the supply.

The harmony that has prevailed the entire year in all relations, with janitor, assistants, and Trustees, has helped in large measure to lighten the task of the year's work and responsibility.

Respectfully submitted,

ALICE G. WHITE,

Librarian.

REPORT OF THE SCHOOL COMMITTEE

To the Citizens of Quincy:

The School Committee earnestly invites your careful attention to the condition of the public schools, the maintenance of which calls for such a large part of the city's budget, but whose aims, methods and accomplishments are not appreciated by many.

Criticisms of your Committee is frequent, but often unjust because of inadequate knowledge of conditions.

Your Committee, whose acts are largely legislative and judicial, are in a position to judge best, and should be able to judge more wisely, questions of public school policy; yet, although we were twice asked to make a recommendation to the City Council relative to a site for the proposed schoolhouse in the Bigelow district, and each time went over the ground suggested and after giving careful consideration to the comparative merits of the different lots, unanimously recommended the South Street lot, the City Council, in this case, as in the case of the Adams School site, rejected our recommendation and voted to purchase the Lowe Street lot.

Satisfactory school lots have been recommended at Norfolk Downs and Squantum.

In asking for our annual appropriation, this year as usual, we requested the exact amount of money that would be actually needed to run the public schools.

As an example of the closeness of our estimates, it will be remembered that although the Mayor cut \$2000 from the last school budget, the amount was restored by the City Council when it was shown to them to be imperatively needed; and again this closeness of calculation is shown by the unexpended balance, \$1.71.

The efficiency of our schools is well shown by the results we continue to get, with expenditures proportionately less than those in neighboring towns and cities.

The administrative work of the board is largely delegated to the Superintendent of Schools, and in Mr. Albert L. Barbour, we have found a most efficient servant.

It has been necessary to disappoint, with adverse decisions, many petitioners who have appeared before the Board this year with requests of various natures.

These requests have referred to change in boundary lines of school districts, to the age of entrance to the first grade, to the number of sessions in the lower grades and various other matters.

An overcrowded room has sometimes made an unfortunate distribution of scholars necessary, but with adequate school accommodations better boundary lines will be made.

In questions regarding number of sessions in the lower grades, age of entrance and all such questions of school policy, we have tried to be influenced in making our decisions by the consensus of expert educational opinion, and by the practice of communities whose reputations in educational matters rank high.

The city is especially to be congratulated upon the success of the full-time Industrial School, whose popularity is attested by a waiting list, at present of over eighty boys.

The desirability of increasing the capacity of this school is so apparent, even as a matter of good business policy, that the necessary funds should be forthcoming.

The Evening Schools continue their good work and popularity.

There has been a marked increase in the demand for school halls which the Committee welcomes when such use is for public or educational purposes.

An ample playground is an imperative necessity to a school. The playground at the Coddington School being very limited in area, a lease has been entered into with Mr. Henry M. Faxon for a lot of land adjoining the school property.

Mr. Faxon generously offered this lot of land for a term of five years, provided the city would build and keep in repair a suitable fence around it, and pay the taxes for the period. This offer, which will mean an annual expense of about \$200, it was deemed advisable to accept.

Another item of expense which we have been obliged to assume is for transportation of scholars from Rock Island. The building of the bridge on Rock Island Road was stopped by the Port Directors of Boston, and as the road is impassable, and the only available route to the Atherton Hough School is too long for the children to walk, it has been necessary to transport them.

An increase in the masters' salaries was necessary to bring their pay nearer the level of the average in other places.

The Committee sanctioned the formation of a High School Alumni Association, and welcomes its advent as a potent factor in promoting loyalty and fraternity among the graduates and increasing a healthy school spirit among the undergraduates.

Good progress is being made on the addition to the Atherton Hough School, which we hope may be ready for occupancy at the spring term.

The success of a school nurse wherever one has been employed has been so marked that the Quincy Woman's Club has proposed to assist the Committee by meeting the expense for the first year's work of such a nurse, and we feel sure that a demonstration of the benefits of this step will be such that the city will wish to make the work permanent.

The foregoing report, presented by a special committee, consisting of Dr. William G. Curtis, Mr. Alfred O. Diack and Mr. Arthur B. Foster, was adopted as the annual report of the School Committee of 1914.

ALBERT L. BARBOUR,

Secretary.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee of Quincy:

Gentlemen: I have the pleasure of submitting to you my sixth annual report as Superintendent of Schools, it being the fortieth in the series of such reports and accompanying the sixty-fifth annual report of the School Committee.

The Progress of the Year

The year has been a period of quiet progress with a few features of especial moment:

In September, the Industrial School opened a full-time department in two trades, the joiners and the electricians, with a full enrollment and a waiting list twice as great as the enrollment.

The School Committee has, in addition, authorized the Superintendent to investigate and report in reference to the advisability and method of establishing an Industrial School for girls, a matter which is given further discussion later in this report.

An unusually large increase in attendance both in the High and elementary schools has occasioned the employment of a number of additional teachers and has brought about overcrowded schoolrooms in several of the buildings, especially the High, Washington, Atherton Hough and Massachusetts Fields Schools.

No new schoolrooms have been added during the year, but the addition to the Atherton Hough School fast approaching completion will provide relief for that section of the city.

The Evening School term for the instruction of illiterates has been lengthened to eighty nights and the attendance in the evening trade classes has shown a very great increase.

The maximum salary for grammar masters has been increased to \$1800 in order that the city may be able to hold its own against cities of equal size in the employment and retention of able and progressive men for these important positions.

Attendance and School Accommodations

An examination of the report of school attendance for the four months of the present school year shows that there have been about 350 more pupils in daily attendance this year than was the case in 1913. That is, the growth of the past year is equivalent to eight full schoolrooms. There is every prospect that the increase in succeeding years will not fall below this number but will naturally tend to be greater. As only two new schoolrooms were added to our accommodations in 1913, none the previous year, and none are now in process of construction for the present year aside from the Atherton Hough addition of four rooms, it can be seen that the city is not now building in proportion to its growth and that the time is already here when for a time, at least, we must get along with inadequate school facilities.

Schoolhouse lots, it is true, have been recently purchased in three different parts of the city, Squantum, Norfolk Downs and Ward 2. On the two lots last named there ought to be no unnecessary delay in

the construction of buildings of good size if we are to relieve a situation that is already becoming acute in several of our schools. It is to be hoped that in the construction of our new buildings hereafter, the city will guard against the mistake of making inadequate provision for the future. The experience of the last five years in building schoolhouses in the city has shown that in practically every instance the new schoolhouse has been designed for the present needs alone, with little provision for the next few years ahead. There should always be an ample margin, over and above the present needs, the size of which should depend upon the rapidity of growth in school population in the district for which the school building is provided.

Along with other increases, the High School puts before us a problem which cannot be disregarded much longer. There are already more pupils in the school than there are seats and desks. A partial solution is suggested in another section of this report which may be worth trial.

To some extent the increase in our school attendance in the upper grammar grades and High School classes is due to the operation and general enforcement of the child-labor laws. The employment of children under sixteen is hedged about with so many restrictions, and very properly so, that many employers are refusing to employ children of that age in any capacity, so that while the opportunities for employment are gradually becoming fewer, children of necessity must remain in school until they have reached the legal age when they may be generally employed.

Finances

The subject of finance is one with which all school committees and superintendents have to deal.

In a city that is growing in population very rapidly, from the very nature of our work, it is inevitable that the expenditures of the department should also increase rapidly. Whenever it is announced that the annual gain in school attendance has been three hundred and fifty or so, as has been the case this year, it follows as a matter of course that the increased cost in maintenance of the school department is going to be an amount which almost any one knowing the per capita cost of our department may roughly estimate. This is a fact, so plain as hardly to be worth stating.

Moreover, any one studying the financial reports of this or any other school department will note that throughout the State the per capita cost of administering public schools has also been rising steadily. He would be dull indeed who would fail to recognize the causes.

Increased salaries for teachers and supervisors, increased cost of all kinds of supplies, the increase demand for new books and appliances, for playground work and so on; the popular demand for smaller classes per teacher, for more manual and physical training, for better and broader High School courses, all these and many other factors are constantly increasing the sphere of public education, and as a consequence are adding to the expense of educating each child.

Now from the foregoing statement of facts it must not be assumed that the School Department takes a defensive attitude in regard to its expenditures. On the contrary, its attitude is just the opposite. It would call attention to the very essential fact that the city ranks very low among the cities of the State in the per capita cost of education, almost at the foot of the list; that the portion of the tax levy which the city expends for its public schools each year is a constantly diminishing

ratio, as a table on a later page of this report will show. It invites attention to its many overcrowded classes which need remedy, to its costs of operation, instruction, supplies, etc., with the hope that the time is near at hand when a more liberal provision can be made.

Viewed from any angle or by any comparison, the city's expenditures for public school purposes are most modest, and it is only by the most rigid economy and careful calculation that the Quincy school system is measurably able to meet the demands that are laid upon it and at the same time produce results which need no apology.

Administrative Control

At the close of the year the School Committee arranged to place the attendance officer on full time, as is done in other cities, so that he will give his undivided attention to the school census, the labor certificates and the enforcement of the school-attendance laws, with regular office hours at the office of the Committee. This action will be of great assistance to the efficiency of the department. The employment certificates will hereafter be issued from the office and all the records connected with these certificates, being on file and accessible, will be of much value in securing a proper attendance both at day and evening schools. Additional clerical help will be needed in the department this year to take care of the increasing volume of business, due not only to the general increase in school buildings and school population, but to the requirements of new laws which are constantly adding clerical and statistical details. For instance, the opening of industrial schools, both day and evening, requiring separate sets of financial and attendance statistics; the uniform system of accounts, recently adopted; the operation of the new Teacher's Pension Act, with its additional records, and the new city ordinance with reference to purchases, which will entail a very great increase in the amount of clerical work necessary.

I would recommend that instead of engaging another clerk for the department, we call upon the commercial department of the High School to co-operate with us. In that way we shall be furnishing the school with an opportunity to give some of its advanced pupils an office practice which will be of value, while the School Department will get all the clerical help it needs at a purely nominal cost. The volume of business now carried on at the Committee rooms makes it imperative, too, that larger accommodations be secured as soon as possible.

Teachers' Pension

In September the Teachers' Retirement Law went into effect and should have mention in this report.

By the terms of this law a State Retirement Association is created, membership in which is compulsory for all new teachers hereafter elected and optional for teachers already in service. The age of retirement is fixed at a period from sixty, when retirement is voluntary, to seventy, when it is compulsory. Upon retirement, the teacher receives a pension based upon the length of service, salary received and consequent payment to the Association. Teachers are required to contribute annually to the Association an amount which in general is 5 per cent of the salary received, though it may not be less than \$35 or more than \$100.

The annual pension paid upon retirement, funds for which come

in part from the annual assessments and in part from the contributions of the State, is sufficient to free the teacher from the thought or fear of privation in old age. One of the teachers of this city was among the first to benefit by this law, and it has been generally welcomed among the teachers of the city and the State.

A new Tenure of Office law which has also gone into effect, provides a tenure for all teachers after three annual elections, which will obviate any hasty or unjust treatment. Happily, the conditions in this city have been such that teachers doing faithful service have never had reason to fear. The enactment of this law, however, gives to the teachers of the State by law, a surety of treatment which in this city has been a matter of long standing custom.

Matters of Hygiene

Easily the first pre-requisites of a good school are hygienic school conditions — proper light, heat, ventilation — in so far as engineers can agree upon it, recesses or play at intervals, adjustment of programmes to periods of maximum efficiency and fatigue, and so on. These factors we are fairly well able to control.

Then it becomes important that the pupil on his part be of normal development and health, be habituated to a hygienic mode of life, especially as to food and sleep, and be reasonably resistant to fatigue and illness. Unfortunately, there will always be many of our pupils who fall short of fulfilling these pre-requisites for effective school work. A great many school children are constantly in a physical condition just below par, due very frequently to remediable causes. A great many school children have occasional periods of absence from school because of illness, with no medical attention and with no skilled home care, whose periods of absence might be reduced very considerably if the School Department had in its employ some one whose attention could be given to such cases. For this reason the Superintendent has advised the employment of a woman who would fill the office of school nurse and home visitor and whose special function would be to act as the intermediary between school and home, wherever she can be of service to either party in bringing about better health among school children in general and in inducing better health habits in certain school children in particular.

The only assistance that the schools now receive is a weekly visit from the school physician whose principal task is the examination of suspected cases of contagious diseases. The duties of the school physician begin and cease with endless notifications to parents, of which usually very little notice is taken.

As Dr. Hoag, the Director of School Hygiene for the Minnesota State Board of Health, writes in Bulletin 555 issued by the United States Bureau of Education:

"This has been the experience everywhere. Without an effective follow-up service conducted by visiting nurses, medical inspection is ineffective. Until 1908 New York City relied upon postal cards sent to parents of defective children, and was able to secure action in only 6 per cent of the cases where treatment was recommended. Immediately upon placing the follow-up service in the hands of school nurses the percentage increased to 84. This brought treatment of nearly 200,000 additional pupils.

"In a word, the difference between medical inspection without and medical inspection with school nurses is almost exactly the difference between mere diagnosis and cure.

"In a majority of cases parental neglect spells ignorance. The postal-card notification is a poor educational device. The nurse goes into the home and by tactful presentation of the child's case effects what no other agency could accomplish. She not only secures action in the case at hand, but she becomes a permanent advisory influence in the homes where she visits. She does what the iron hand of law could not do. We can hardly imagine any kind of legal machinery, devised for compelling parental treatment of children's defects, which would succeed in as large a percentage of cases as the school nurse does.

"In the second place, medical inspection without school nurses is always a costly tax on attendance. Children with scabies, impetigo, pediculosis, etc., are sent home by the thousand, there to mingle on the street with other children after school hours, beyond the control of the school and without effective treatment. Where diseases of this kind are treated either by the nurses at school or by the parents after her instruction, exclusions are usually reduced to 5 or 10 per cent of the number previously necessary. In New York the reduction was from about 10,000 to about 1000 per month. In a quarter of a school year exclusions were enforced in New York as follows: Measles, 18; diphtheria, 140; scarlet fever, 13; whooping cough, 61; mumps, 13; chicken pox, 172; trachoma, 1264; pediculosis, 8994; skin diseases, 661; miscellaneous, 1823; nearly all of the latter four classes of exclusions being preventable by school nursing.

"Over 95 per cent of the above exclusions would have been prevented by school nurses. By her ministrations and instruction in the home these diseases of filth and neglect are almost eliminated. As expressed by Jane Addams *Amer. Jour. of Nursing*, 1908:

"The best of medical inspection succeeds only in sending the child home; they say that such-and-such a child would have a bad effect on the other children, and, therefore, he is sent back to the family physician for treatment. In most cases a family physician is not called in, because, in the words of Artemus Ward, 'There ain't none,' and, therefore, the child is kept out indefinitely, and the public school, so far as that child is concerned, is doing nothing, and the child continues to play in the alley and on the street or sit in the doors of the tenement with the rest of them. This is the whole idea — that medical inspection was succeeded and almost transposed by the addition of the visiting nurse. The medical inspection got the child out of school and the visiting nurse got the child back. It seems almost foolish to have medical inspection without the visiting nurse.'

"By virtue of her room-to-room visitation and her opportunities for observation the school nurse also becomes the ideal sanitary inspector. She notes temperatures, ventilation, seating, cleanliness of room, toilets, blackboards, and the clothes of children. Her hospital standards of sanitation tend to follow her into the schools.

"The school nurse, like the municipal district nurse, is first and last a social worker. Important as are her duties in the school, her ministrations and educative influence in the home are still more valuable. She instructs ignorant, but fond, mothers in the best methods of feeding, clothing and caring for their children. She is received in in their homes as no other official visitor could possibly be. Mothers are quick to detect the genuineness of her interest in their children and are often ready to follow with blind faith any instructions

she has to offer. At her advent in a tenement or street the mothers not infrequently crowd eagerly around her, plying her with questions and bringing their babies for inspection. The school nurse is thus a potent factor in diminishing infant mortality. In short, Dr. Osler does not overstate the case when he says that the visiting nurse is 'a ministering angel everywhere.' In many a family she becomes a spiritual adviser, pointing out not only inadequate sanitation which keeps them sick, but also educating them on the folly of cutthroat chattel mortgages, unnecessary furniture purchases at ruinous prices on the installment plan, the shortsighted policy of taking children prematurely out of school to work, etc. All this is especially important in the Americanization of the ignorant foreign-born population. As stated by Dr. Darlington of New York City:

"In all large communities the poorer element of the foreign-born population presents the greatest problem encountered in municipal health work. Diversified in their habits, often superstitious and resentful of any interference with their mode of life, oppressed by poverty, frequently ignorant or neglectful of the simplest sanitary requirements, their assimilation as citizens of their adopted country comes only as a result of sanitation — persistent, inclusive, and never ending. In public health work this education is brought about by various means. Lectures, printed instructions, and publicity in all its forms are used, but the most valuable and effective form is found in individual instruction in the home. Personal efforts, advice, instruction and demonstration offer the most practical and effective means, and we have found the employment of trained nurses for the purpose of inestimable value."

"That the visiting nurse is a good economic investment is evidenced by the fact that some of the large insurance companies find it to their advantage to employ a number of them to visit the homes of policyholders and give instruction in matters pertaining to hygiene. Department stores and factories also find it good business to employ nurses to look after the health of their employees and to teach them personal hygiene. The visiting nurse is a 'health nurse.'"

Moreover, the school nurse would be the instrument by which a great many of our school children could share in the advantages of the treatment afforded by the great free clinics offered in Boston, more especially at the Eye and Ear Infirmary and at the Forsythe Dental Infirmary. This alone would be a tremendously valuable side of her work.

In view of all this, it is with the greatest pleasure that we learn that the Quincy Woman's Club will undertake the support of a school nurse for the year 1915 as a memorial to mark the completion of ten years of public service.

It is safe to predict that this new axiliary to our work will at once make its value felt in the community and will in future years be a permanent factor in the School Department.

Evening Schools

The evening schools represent a phase of education to whose importance we are only just beginning to give thought. The statutes require that one or more public evening schools be maintained in every town or city of 10,000 inhabitants; it does not, however, specify the number of such schools or the length of term, leaving such details to the city. Our common evening school classes are of two types: those for the

instruction of illiterates, in the English language, which might be called naturalization classes, and those for our own citizens in such of the common English branches as they may generally choose.

Last year the city doubled the length of term at the Adams Evening School and gave sharp attention to the enforcement of the attendance laws for illiterate minors. No one can afford to be blind to the necessity and value of this kind of work and no city having illiterates within its confines can afford to slight their education. There have been witnessed in this country within recent years so many distressing illustrations of the folly of such neglect that communities are well agreed upon the vital necessity of teaching our language, customs and laws. In a way this phase of evening school work ought not to be, although it is, a matter of local community burden and expense. Our experience has shown that the local community almost always is performing this service of education for the benefit of other communities. Each year in our evening schools we face an entirely new body of illiterate men and women, and inquiry shows that the pupils of the previous year have sifted back through the country to other communities, this city, like most of our coast cities, being little more than a clearing house for the newly arrived immigrants. An effort was made last year through the legislature to provide State aid for the support of these classes in order to distribute more generally the burden of expense for an undertaking, the benefits of which are generally shared by the nation at large. Although it was not successful, its justice was admitted and the attempt will again be made.

The City of Quincy, far from shirking its burden, has given money and energy to the maintenance of these schools, and each year has seen added enrollment, increased attendance, more results and a greater interest on the part of those in attendance in learning the American language and ideals. It has been a great satisfaction to see an appreciation of what the city offers.

The other phase of our evening school work is intended primarily for those who already have a rudimentary education and all attendance is entirely voluntary. Beside the common English branches, there was instruction in drawing, bookkeeping and a specialized preparation for any who planned to take civil-service examinations. This side of our work has been the same for several years and grows slowly but steadily.

Looking at all our evening work in a broad way, the one thing which stands out most clearly is the fact that those classes are best attended and accomplish most whose members are animated by some purpose connected with their life work, while those accomplish least which have no vocational connection. None of our so-called commercial evening school work, for instance, has yet reached a plane where it can be called at all satisfactory from the standpoint of clerical education though it does accomplish excellent work in the fundamentals.

The evening trade classes, however, which are discussed in the Industrial School report, are doing work of the most satisfactory character.

High School

The report of Mr. Ernest L. Collins, Headmaster of the High School, which is embodied in this report, gives an account of some important phases of the work of the school. The essential fact to

emphasize in connection with the school just now is that the school building can accommodate no greater number of pupils than at present without serious loss of efficiency from overcrowding. In other words, added numbers will bring discomfort, general confusion in school work and difficulty of administration. The experience of the past few years with our growth in population and large percentage of pupils attending the High School bids fair to be a continuing one. The city is, therefore, brought to the point where it must provide for this normal increase of the coming years. The question will at once arise: In what way and for what class of pupils shall these new High School accommodations be provided? Before committing itself definitely to any building policy, it would be wise to consider whether the ninth year of school work, the Freshman High School year in other words, might not in some departments at least be carried on in some of the grammar school buildings which are hereafter to be erected and which could be provided with sufficient rooms for that purpose. This movement toward the so-called Junior High School, or intermediate stage between the elementary grades and the last three years of the High School as we now know it, has gathered considerable impetus in recent years and has much to recommend it. For one thing it will lead toward elasticity in the course of study and differentiation a little lower down than we now provide it. Our short experience with the provocational classes established in 1912 has shown us how many children there are who can be kept in school and given suitable education, when education is provided of a nature that will inspire interest and yield profit. It is quite possible that similar differentiation might be made in other sections of the city and along other lines, to continue through the ninth year as well as the eighth, and leading to the High School proper or Senior High School for the last three years. If, it may be, there are certain courses in which this may not be profitably done, there are certainly others that lend themselves quite readily to such an arrangement. The plan as it is now worked out in other communities ought to be studied very carefully to determine how far it is profitable for our situation.

An especial feature of our High School work which is deserving of notice is its steady and persistent gain in its standard of scholarship each year, so far as we have any trustworthy scale of measurement to judge by. An inspection of the work done during the past five years by successive freshman classes during their first term of school bears eloquent testimony to the better records made by the new comers, while in all classes the number of pupils dropped to a lower standing diminishes steadily from year to year. This is, of course, what we are seeking and the energies of the school are directed constantly toward making as many pupils as possible profit by their school attendance. For this purpose the afternoon sessions for special help inaugurated a few years ago are proving of great assistance.

Among the items of interest to be noted in the statistical report of the High School, printed on a later page, is the very great number of pupils who enroll for a commercial course, or what may better be termed a clerical course. This same condition exists in nearly all High Schools and it is probably safe to say that there is relatively a greater number of misfits in this course than in any other that the school affords, which results in sending out finally a considerable number of pupils who are not especially adapted for the work they have chosen. Probably in no line of world activity today is there a greater surplus of labor than among the ranks of business or office employees, many

of whom have been attracted toward it because of disinclination toward work of a more laborious nature. When young people are influenced in selecting their future life work by their natural tastes and capacities and not by a prejudice against any employment which is accompanied by toil and its attendant, sweat of the brow, we shall have fewer failures in life.

The opening of the full-time Industrial School tended to diminish slightly the increase at the High School and there are other boys who would transfer to this school if they could be accommodated.

It would seem that the time is about ripe now for the city to open a Vocational School for Girls which would train its pupils definitely and exclusively for home making. Such a school would draw its pupils very largely from the Household Arts Course of the High School, would probably entail very little added expense and would fit the needs of a good number of our girls better than is now possible with a High School department.

The College Preparatory Course of the High School, a course by which a school is very often judged, especially by those who lack an appreciation of the full purpose of such a school, is doing increasingly good work among a large field of students. The records of its graduates who took the Harvard examinations last June are pretty conclusive evidence on that point.

The spirit of the school, its sensible attitude toward its work, its management, sports and all its student activities are highly creditable.

The report of Mr. Collins is printed herewith.

MR. A. L. BARBOUR,

Superintendent of Schools.

I have the honor of submitting to you my annual report for the High School.

The registration this year has shown the usual increase as the statement of comparison with former years will indicate.

	1914	1913	1912
Whole number enrolled,	987	939	874
Whole number at date;	933	864	790

It may be seen from the above statement that the number of pupils retained in the school is relatively larger than in previous years. Economic conditions and the Employment Law may be largely responsible for this increase, but it is a condition which has had to be dealt with, nevertheless. Only by the use of the assembly hall for study classes could the large number of pupils now in the school be accommodated. It is no longer a matter of providing convenient accommodations for classes, but rather of providing any at all.

The full-time Industrial School took care of a considerable number of boys who would otherwise have complicated the matter of accommodations in the High School, and it will be necessary to devise other means of relief from year to year until such time as the citizens find themselves able to solve the problem of erecting another High School building.

As is always to be expected, there have been several changes in the corps of teachers during the year, but it has been possible in every case to provide teachers who were able to continue the efficient work of their predecessors. Because of the large number of pupils, it was

found necessary to increase the number of teachers. At the same time it became possible for us to decrease the number of pupils in some of the divisions, the wisdom of which has been shown in a reduction of the number of failures, particularly in the entering class.

There have been a few changes made in the course of study of the school in order that its efficiency may be increased. A course in Elementary Science has been established which is required of all pupils in the Manual Arts and Household Arts divisions and elective in other divisions. The purpose of this course is to give the pupils an introduction to science in general and an attempt is made to differentiate the work in the various divisions so as to apply directly to the distinctive work of those divisions. The course in Botany and Physiology has been transferred to the third year where these subjects can expect and demand more intelligent attention from the pupils studying them than in the first year. Typewriting is offered two periods per week in the second year of the Commercial course. Because of the additional time given, pupils should be able to master the technical part of the subject before the beginning of the fourth year, so that this last year may be devoted to a practical application of the subject as required in actual office practice. In the third and fourth years of the Commercial course pupils may have an option of Stenography or Bookkeeping in order that they may specialize in one of these subjects if they wish.

Considerable interest in music has been shown in the past year. Besides the regular instruction in chorus singing there has been a class in harmony for girls intending to enter State Normal schools, and also a Glee Club and an orchestra. The two latter organizations are composed of pupils considered qualified for the work and are under the immediate direction of the Supervisor of Music. For regular and punctual attendance at rehearsals and for faithful effort the members of the Glee Club and orchestra receive one promotion credit. Three concerts have been given during the year, two during the regular session for the pupils themselves, and one in the evening to which the public was admitted. Besides these concerts, the Glee Club and orchestra have furnished musical programs at several entertainments given by the school. All of these performances have been notable because of their marked excellence, and for this great credit is due Miss S. Maude Amsden, Supervisor of Music, who has been able to arouse throughout the school an enthusiasm for and a real appreciation of good music.

School athletics are receiving much attention at the present time from the public at large as well as from school authorities and the pupils themselves. It may be worth while to note what is being done in our own school. There have been teams representing the school in several different sports, and all have made a creditable showing, some of them having displayed unusual excellence. In connection with sports in this school two facts of value may be mentioned: one, that the scholarship is improved rather than impaired by them; and the other, that the sports are still indulged in from the love of true sport without any taint of commercialism. That athletics are a distinct benefit to the boys and the school is due largely to the untiring efforts of several of the male teachers who devote much of their valuable time to intelligent guidance of the boys in their sports and who have through this means gained the power of strong influence over the boys. It is very difficult to carry on the various sports in the school because of the very limited means at our disposal; in fact, it is some-

times impossible to provide funds for the purchase of absolutely necessary equipment. However, the citizens have seen fit to provide ample grounds adapted to nearly all sports and readily available not only to players, but also to spectators, and probably the matter of sufficient means to carry on sports will receive proper attention in due time. Up to the present time the boys have received practically all the attention so far as sports are concerned, but it is the intention to encourage sports among the girls also, and to devote to them the same effort as is given to the boys.

In closing, I desire to express my gratitude to the many who by acts of kindness and words of encouragement have made the work of conducting the school a pleasant task. To Col. Edward Anderson we are again indebted for additions to the already large contribution he has made to the school library. The School Committee and yourself are deserving of our gratitude for the facilities placed at our disposal and for the loyal support in all our efforts to promote the welfare of the school.

Respectfully submitted,

ERNEST L. COLLINS, *Head Master.*

It is difficult in a yearly report to present all things in proper perspective. A school department, as the members of this School Committee can readily testify, has little of the routine about it. Education at public expense is constantly enlarging its field, has new objects in view, adopts new methods and goes farther each year in the way of public service. Each year sees some advance, sees new needs met and new wants supplied. That the public looks to the school department to cover this broad field is testimony to the faith which the American people have in their school system, a faith which inspires in school officials both enthusiasm and confidence. The past year, as this report indicates, has been one of advance and accomplishment. The coming years present problems for solution that are important and far reaching.

With a continuance of the harmonious spirit of co-operation in which, committee, superintendents, teachers and community have worked in the past, we may look forward to a pleasant and prosperous new year.

Respectfully submitted,

ALBERT L. BARBOUR,
Superintendent of Schools.

REPORT OF THE QUINCY INDUSTRIAL SCHOOL

The progress of the industrial classes during the past year has been steady and consistent.

The Half-Time Class, which was the first of our undertakings, has done efficient work with a slightly smaller enrollment than for the previous year. The industrial depression which affected our manufacturing establishments early in the year reduced the number of apprentices employed, with a consequent effect upon the school. In some cases, apprentices dropped from employment continued on full time in the school, awaiting re-employment; in other cases they left school when their employment ceased, and took up work wherever they were able to find it. It seems advisable and it is recommended that the school hereafter continue on a fifty-week basis, instead of

forty, and six days in the week instead of five, in order that the factory may not be embarrassed with a double set of apprentices at any one time.

In conformity with the plans outlined in the report of last year, a Full-Time Department was opened in September with thirty-six boys in attendance, and a waiting list which was large and has since been increasing. Three new instructors were added to the school at that time, one to take charge of the shop work for joiners; one to take the shop work for the electricians, and one to take care of the academic work. All three instructors were skilled mechanics of the highest type and have begun their work with interest and enthusiasm. This department of the school will be maintained on a forty-week basis, five days each week, and is open to all boys who are fourteen years old, who have the requisite mental and physical ability to do the work. This school, therefore, does not require the completion of the grammar school course before entrance, but it should be stated positively that it is not a place for a boy of inferior mental power who has no capacity for academic work. The skilled artisan is a man of brains and without the brains he cannot acquire the skill.

It is the present intention of this school not to teach the whole trade in the school but to carry the boy along in his trade until at the age of sixteen he is able to secure employment in a shop, where he will be able from then on to complete his apprenticeship under shop conditions and with attendance every other week in the Half-Time School.

To meet all the demands which are being made upon it, the Full-Time School should be enlarged in September by the addition of two more departments, the machinist's and the sheet metal trades. This would accommodate thirty-six more boys and the school could thereafter be kept at the constant maximum of seventy-two boys and would furnish proper preparation for the trades most commonly plied in this city.

The evening trade classes both for men and women have been the most diversified and the best attended of any year in our experience with this form of evening instruction. New classes formed this year that have never before been given included drawing and blue print reading for electricians, naval architecture, roof-framing and stair-building, while the classes for women were reorganized this year on a unit basis, so called, for certain specific objects, with increased attendance and enthusiasm. This evening work will vary from year to year both in amount and in kind according to the conditions of employment among the skilled trades which it serves. The School Department is trying each year to meet such needs as arise, with the hope of providing for the skilled artisans in the various trades the opportunity to broaden their grasp on their work.

Provision should be made as soon as practicable for the opening of an industrial school for girls. Such a school would differ from the present Household Arts Department of the High School in several essential particulars, and would undoubtedly fit the needs of many of our girls much better.

Any girl would be admitted to this school who had passed the age of fourteen and had the requisite mental and physical maturity. It would have a course of two years instead of four and would devote half its time strictly to practice in the home making arts, with the remaining half of the time given to related academic subjects.

The session of such a school would be longer than that of the common schools, with a definite amount of time given to related home projects done under the advice of the teacher. The school might very well be

carried on in the High School building where the lunch counter would serve as laboratory practice and would, like our other vocational schools, be under the supervision of the State authorities who would pay one-half the expense of maintenance. No doubt the greater number of girls who would attend this school would be of the type now attending the High School, so there would be practically no additional expense entailed. The establishment of the school, however, and its successful operation would mean one more step taken in the direction of affording to every child that kind of education and training which she most desires.

The report of Mr. J. G. Spofford, the Principal of the Industrial School, follows and will interest those who are following this type of work.

ALBERT L. BARBOUR,
Superintendent of Schools.

Quincy Industrial School, Quincy, Mass.,
January 5, 1915.

MR. ALBERT L. BARBOUR.
Superintendent of Schools,
Quincy, Mass.

My dear Mr. Barbour:

I herewith submit my third annual report of the work in the Quincy Industrial School.

The co-operative department began the year with an attendance of sixty pupils alternating between school and factory. This number remained about the same until May 16, when, on account of business depression, ten pupils were laid off or transferred from the trades which they had chosen to other trades where they could be used to better advantage. Of these ten boys, eight were on their trial period in the shop, showing that they had not worked the required six months of their trial period.

In practically all cases, these boys were placed in the industries in this city at the trade which they had started to learn or in a trade of their second choice. The average attendance in the operative department was ninety-four per cent.

We have made an exhaustive study in the past two years of the relations of the school to the factories, and have found it to be necessary to place the co-operative school on a five and one-half day week program.

I have talked the matter over with the various superintendents and have stated that the school was in a position to run on a five and one-half day week and fifty-two week year program if they deemed it advisable to do so, and in every case the reply was in favor of the longer week and year.

I have observed that, in order to have the closest harmony between the industry and the co-operative school, the school must run in unison with the industries. We must operate the school so as to cause the smallest amount of friction possible in the industry — therefore, the co-operative school opened in September on the five and one-half day week program. I would earnestly recommend that the school be placed on a fifty-two week basis. This, of course, will entail extra expense during the summer months, but I feel that the proposition

should be maintained to make the work of the school efficient and in harmony with the industries.

In September the co-operative school opened with forty-eight pupils in attendance, and an account of the business depression and conditions in the city, we have been unable to increase that number to date; however, I expect that in the course of two or three weeks the school will have its full complement of sixty-two pupils.

The Full-Time School

The full-time school, as authorized by the School Committee and Advisory Board, secured the equipment for the woodworking shops and electrical department during the early summer. The equipment in the woodworking department consisted of one No. 1½ American Variety Saw, one 36-inch American Band Saw, one 12-inch American Safety Cylinder Buzz Planer, one 8-inch by 24-inch surface planer, one emery wheel stand, one automatic hollow chisel mortiser, one pattern maker's lathe, 11-inch swing, 6-foot bed, one hand trimmer, 10 horse power General Electric induction motor with starting compensator for same, and the necessary hand tools for the bench work, all of which were ready for use when school opened in September.

We secured the belting from L. Grossman & Sons, who made us a present of same.

The electrical department was equipped with such tools as cutting pliers, screw drivers, hammers, soldering coppers and the necessary materials of that trade for electric light wiring, bell wiring, etc.

The course of study for the full-time division comprises arithmetic, trade mathematics, trade drawing, civics, English, and geography.

The time allotted to the shop work is 50%. The time allotted to the related work and cultural subjects is 50% of the total time in school.

This school operates from 8.15 in the morning to 2.30 in the afternoon with twenty minutes, from 12.10 to 12.30 for lunch; is in operation five days per week for forty weeks, maintaining the same vacations as the public schools. The attendance in this school has averaged 96% for the four months. We have thirty-six pupils in attendance and a waiting list of about eighty, who wish to take up the work. In September, when school opened, we had to select thirty-six boys from an application list of seventy. This would seem to indicate that a large per cent of our boys or their parents realize that it is only a matter of a comparatively few years when their boys must enter into some wage earning occupation, and therefore, have endeavored to start their boys right by giving them the opportunity of taking up the work under expert instructors in a trade school.

The work carried on in the school is of strictly commercial type, as will be seen from the following record of the work accomplished, or in the process of accomplishment at the present time:

4 drawing stands for Evening Industrial School (completed).

Wiring for 14 lights, Evening Industrial School (completed).

7 drawing tables, 8' x 30", Evening Industrial School (completed).

1 drawing table, 10' x 30", Evening Industrial School (completed).

Wiring for 10 bells with transformer, Day Industrial School (completed).

Wiring for joiner shop for 20 lights (completed).

Repairing 32 drawing boards, Evening Industrial School (completed).

Work bench for electrical department, Day Industrial School (completed).

- Inspection and repairing electric circuit in attic, Day Industrial School (completed).
- Wiring cellar for 6 lights, Day Industrial School (completed).
- Laying soil pipe, making cement floor, proper drains for Electro-Plating Plant for Day Industrial School (completed).
- 7 electro-plating tanks, Day Industrial School (completed).
- 8 double work benches, for joiner shop, Day Industrial School (completed).
- 4 straight edges, $2\frac{1}{2}'' \times 4' 6''$, Evening Industrial School (completed).
- 16 splines for mold loft class, Evening Industrial School (completed).
- 18-30" cherry tee squares, Evening Industrial School (completed).
- 1 trestle for 8 boards, Evening Industrial School (completed).
- 2 lights for drawing room, Evening Industrial School (completed).
- 18 cherry tee squares, Co-operative School (completed).
- 1 delivery body for Ford Automobile, outside party (completed).
- 1 double molders bench, Day Industrial School (completed).
- 1 photograph cabinet (completed).
- 36 pencil sharpeners, Co-operative School (completed).
- 1 drawing board, $5' \times 3'$, outside party (completed).
- Cabinet for inspection report, Day Industrial School.
- Patterns for emery grinder, Day Industrial School.
- Patterns for grinding fixture, Day Industrial School.
- Bench for the electrical department, Day Industrial School (completed).
- 2 paper-towel racks, Day Industrial School.
- 1 kitchen table, outside party (completed).
- Drawing patterns for speed lathe, Day Industrial School.
- 1 portable blackboard, New Adams School.
- 1 oak table, New Adams School.
- 2 cutting tables, $21'' \times 32'' \times 35''$, New Adams School.
- 8 sewing tables, $26'' \times 42'' \times 29''$, New Adams School.
- 1 folding ironing board, New Adams School.
- 12 bases for work baskets, outside party (completed).
- Drawings and patterns, emery wheel stand, Day Industrial School.
- 2 printing frames, Day Industrial School.
- Drawings and patterns, gas forge, Day Industrial School.
- 3 bases for work baskets, outside party.
- 1 work bench, outside party (completed).

The prices for work outside of the school have been figured very carefully and a regular commercial rate charged to prevent any friction on the part of the manufacturers or local union. We guarantee our work to be of first quality and endeavor on every project to keep in mind that the school is for the purpose of instruction rather than production but in order to have the instruction real, it must be accomplished through the boys work in on a commercial product.

As we have such a large number of applicants waiting, it would seem advisable to open this coming September two other departments in the full-time school, namely, the machine shop and sheet metal and coppersmithing trades. Last year we felt it advisable to open the school with the woodworking and electrical trades on account of the expense necessary to open same, but as there are so many applicants marking time in our public schools with practically no interest only to stay there until they can get into the Industrial School or the industry, I think it an advisable expenditure to open these two trades if possible.

We will undoubtedly have a waiting list, unless this is done, of from one hundred to one hundred and fifty boys. I would, therefore, recommend that these departments be opened in September.

- Part-Time Division

The Saturday afternoon class has been in progress over a year and has shown distinct signs of advancement. We have at present ten boys enrolled, five in the Fore River and five in the Boston Gear Works. To show to what extent some of these young men value the instruction received on Saturday afternoon, I have known on several occasions of one young man coming to the school in preference to working on the job where he would have earned from \$1.75 to \$2 in the afternoon. This particular young man has been in attendance practically every Saturday since the school was organized and probably on 75 per cent of the Saturdays would have been able to receive for his Saturday afternoon's work the above amount. There seems to be an increasing demand on the part of some workmen who have not attended this school on the co-operative basis to make the request to be admitted to the part-time class. As yet I have not felt it advisable to enlarge this class to a greater number than twelve in order that I might give each young man absolutely individual attention, and attend to their individual needs in the problems which they bring from the industry to the school.

Distributions of Pupils by Shop

	<i>Co-operative</i>	<i>Part-Time</i>	<i>Total</i>
Fore River,	36	5	41
Couch Telephone,	10	0	10
Boston Gear Works,	2	5	7
	<hr/> 48	<hr/> 10	<hr/> 58
Enrollment of full-time department,			36
			<hr/> 94
Total enrollment in day schools,			94
Applicants waiting for admission to full-time department,			80

The average wage of the co-operative pupils for the past year is as follows:

Couch Telephone	\$247.51
Boston Gear Works	243.28
Fore River	239.58

The total earnings of pupils in the three shops is \$12,505.13. This seems to be an opportune time for me to express my deep appreciation to you for your helpful advice and hearty co-operation in the past year. I would also express my sincere appreciation to the several managers and superintendents for their help and co-operation in the past.

I wish to thank my instructors for their hearty co-operation and the whole-souled backing which they have given me in carrying out the added program this year, in running the school during the vacations which the others schools have, and on Saturdays. This has meant a considerable sacrifice to them in many ways, and I certainly appreciate their efforts.

Respectfully submitted,

J. GOULD SPOFFORD,

Director.

REPORT OF THE SUPERINTENDENT

Gentlemen: I submit herewith my sixth report as Superintendent of Woodward Institute. The past year has been one of consistent and steady work characterized by no important changes in the course of study or the conduct of the school.

At the close of the spring term, Miss Gertrude F. Holland, teacher of French and German, resigned her position and was succeeded by Miss Minnie L. Shedd, a graduate of Smith College with successful experience in Swampscott and Westfield.

Miss C. Louise Steele of the English department was granted a leave of absence for the present year and her place is being filled by Miss Vivian A. Taber, who comes to the school fresh from post-graduate work in Teachers College, Columbia, after successful experience in the Springfield Technical High School.

The feature of the school's work most worthy of note at the present time is the steady and marked gain in its attained standards of scholarship, especially as shown in the records of successive entering classes. The record made by the present Freshman class for its first term of school is much the best of any entering class the school has ever had and if this steady improvement can be maintained and continued, Woodward Institute will soon be brought to a standard where its efficiency in scholarship will be generally recognized. This regular and marked advance shown in the work done by recent entering classes can be attributed in varying degrees to change in courses of study made two years ago and to the better preparation which the grammar schools are giving each year. There is to be added, too, the fact that the resources and energies of the school are now being directed to a slightly narrower field, which of course leads to intensity and efficiency.

In pursuance of the suggestion embodied in the report of last year, the amount of time devoted to music has been increased, and one girl will this year be certified for college on the work she has done in music in our school.

To make the work in music more profitable and in order that the pupils may be brought to an acquaintance with music that is worthy and worthily performed, a Victrola has been added to the equipment of the school. This instrument will be of valuable assistance to the director in teaching musical appreciation and will add greatly to the enjoyment of the work. The pupils will become acquainted with the best things in classical and modern music as they could do in no other way.

A few weeks ago a questionnaire was submitted to the pupils of the school for the purpose of getting an insight into a number of factors that have a bearing on the development of childhood and youth, such as habits and hours of study and the kinds of extra-school activities which enter into the lives of our pupils, either to co-operate with our efforts or to nullify them. The result of a study of the answers to these questions is very satisfying. In the main, and to a far greater degree than popular opinion would lead us to suppose, habits of study and attitude toward school work among our pupils were shown to be remarkably good. Moreover the forms of outside activity which might work against us were surprisingly few. There is an apparent tendency when girls enter the school and find their outside lessons and their school lessons competing with each other for time and attention, to give up their outside instruction in favor of the school work. An

interesting and an encouraging fact, too, is the large proportion of our girls who have some regular and specific work to perform in connection with the conduct of the home. Such a condition is the healthy and normal one but in many communities it does not prevail. It is a fairly safe assertion that the girl who has a reasonable amount of burden to carry in the management of the home will be helped rather than hindered in her development toward womanhood. It is of exceedingly rare occurrence that home duties interfere with proper school work; it is more often the case that the absence of home duties accompanies slipshod, poorly done school work.

The choice of courses by our students continues to indicate a high percentage who are planning to go on to other schools and colleges. When such is the case, necessarily a fairly high standard of scholarship is required for preparation either to pass the entrance examinations or to receive the principal's certificate which will admit to those colleges which allow that method. Those of our graduates who go to college continue to reflect credit on the school and the school in turn takes more and more pleasure in this side of its work.

The science department of the school deserves mention in this report as an instance of the manner in which skillful teaching is able to adapt subject matter to a special type of school. In Woodward Institute it is very rare that a girl wishes to prepare for college in science, so that the teacher is relieved of this rather sharply defined duty and is left free, in general, to shape her instruction to the science to be found in the common, every-day things of life, especially those which have a direct interest for girls. In a general high school or any mixed school, it is rarely that this can be done or that the attempt is made. The course which is given in our school, however, turns off the beaten path of instruction in theoretical science and by applying itself to the ample material to be found in practical science which has that direct interest, achieves results which are commensurate with the ingenuity and enthusiasm with which the work is handled. The course is both distinctive and praiseworthy.

The school property and equipment have been maintained in their usual excellent condition during the past year and there are no interior improvements immediately pressing.

The class of 1917, following the example of its sister preceding classes, presented the school with one slab of the Parthenon Frieze, which has been placed on the walls of the assembly room.

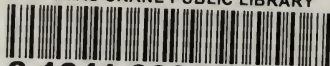

Respectfully submitted,

ALBERT L. BARBOUR.
